General description	The study of world economy must be based on the identification of the essential elements that both define and identify the				
	socioeconomic reality that we aim to analyse. The international economy is conceived as an interdependent system in				
	which the main dynamism arises from the capitalistic center although its effects are quickly spread today all over the world.				
	Therefore, we must begin identifying the structural features of capitalism and defining their international economic relations				
	and conceptualizing the development of these relations.				
	Once this step is taken and since the economic reality under study is composed of innumerable facts, objects and			nerable facts, objects and	
	relationships, some prior selection c	riteria is requ	uired. Hence, the a	nalysis begins with the	e developed capitalist economies,
	then focus on the periphery of the system and subsequently extended itself to the field of international economic relation			international economic relations.	

	Study programme competences / results
Code	Study programme competences / results
A1	Manage an enterprise or small organization, understanding their competitive and institutional position and identifying their strengths and
	weaknesses
A2	Integrate in any functional area of micro-firms or SMEs and perform fluently any management task commissioned
А3	Evaluate and foreseeing, from relevant data, the development of a company.
A4	Elaborate advisory reports on specific situations of companies and markets
A5	Write projects about specific functional areas (e.g. management, marketing, financial) of the company
A6	Identify the relevant sources of economic information and to interpret the content.

		the issue raised the subject, its degree of difficulty, mastery of the issues and ability in	
		oral comunición.	
Workshop	A1 A2 A11 B2 B3 B4	Classroom activities, problem solving, reading, class participation.	35
	B5 B8 B9 B10 C1 C4		

Assessment comments

Each activity of reading + summary + seminar has had a unique evaluation for each student to perform. The set of such activities weighted 20% towards the final.Qualification not presented: Corresponds to students, when only participate in assessment activities which have a weighting less than 20% of the final grade, regardless of qualification achieved. Minimum party of the subject: To pass the course, you need a minimum mark of 10 to 3 in the test mixed Conditions of conducting the final assessment. It is prohibited to access the classroom exam with any device which allows communication with external and / or storage of information.1. "In order to guarantee the possibility that it can pass the course in the second opportunity (art. 18.7), the weight of the continuous assessment in qualifying should be set between 30% and 50%.2. "It is recommended that the evaluation criterion for the second opportunity is the chance to operate in the early assessment."
