Web	http://filosofiaderechocoruna.es/			
General description	Law and biomedicine (Health Law) is concerned with the legal answers to human life and health, which are considered two highly appreciated social and individual values. By means of the analysis of legal sources, case study, lectures and special workshops students learn into depth both classical and current legal answers to life and health issues, stressing the human rights approach. Special attention is paid to classical and contemporary cases, mainly the judgments of national Constitutional and Supreme Courts, as well as the European Court of Human Rights and the European Court of Justice.			

Study programme competences

Code	Study programme competences
A2	Knowledge of the role of law as a regulatory system of social relations
A3	Grasping the systematic nature of the legal system
A4	Appreciating the interdisciplinary nature of legal problems
A5	Knowing the constitutional principles and values.
A8	Basic knowledge of legal argumentation.
A9	Ability to handle legal sources (legal, jurisprudential and doctrinal).
A10	Ability to interpret and critically assess the legal system.
A15	Ability to negotiate and mediate.
B2	Ability to know how to apply their knowledge to their work or vocation in a professional way and possess the skills that are usually demonstrated through the elaboration and defense of arguments and the resolution of problems within their area of study.
B3	Ability to gather and interpret relevant data (usually within their area of study) to make judgments that include a reflection on social, scientific or ethical relevant issues.
B5	Acquisition and assessment of those learning skills necessary to undertake further studies with a high degree of autonomy
B7	Effective problem solving.
B8	Critical, logical, and creative thinking.
B10	Teamwork and collaboration.
B11	Ethical and social responsibility.
C1	Adequate oral and written expression in the official languages.
C4	Exercising an open, educated, critical, committed, democratic and supportive citizenship for the sake of the common good.
C6	Critically assess the knowledge, technology and information available to solve the problems they face.
C7	Assume as a professional and citizen the importance of lifelong learning.
C8	Valuing the importance of research, innovation and technological development for the socioeconomic and cultural progress of society.

Learning outcomes

Learning outcomes	Study programme competences
-------------------	-----------------------------

Achieve the abilities to identify and assess the legal dimensions of life and health issues	A3	B8	C1
	A4	B11	C4
	A5	B3	C6
	A8	B5	C7
	A9		C8
Understand the meaning of the basic legal concepts, principles and norms regarding human life and health	A2	B7	C1
	A3	B8	C4
	A4	B11	C6
	A5	B2	C7
	A8	B3	C8
	A9	B5	
	A10		
Achieve the argumentative abilities to take parte in biomedical decision-making and to advise healthcare professionals	A15		
	A4	B7	C1
	A5	B8	C4
	A8	B10	C6
	A9	B11	C8
	A10	B2	
	A15	B3	
		B5	

Contents	
Topic	Sub-topic
Section I. Health care and justice	1. The concept of health 2. The right to health 3. Health care systems 4. Health justice
Section II. Biomedical decision-making and patient autonomy	1. Clinical relationship 2. Patient autonomies. Concept and limits 3. Decisional autonomy 4. Informational autonomy 5. Executive autonomy
Section III. Beginning of life	1. The status of the human embryo 2. Abortion and termination of pregnancy 3. Medically assisted reproduction 4. Surrogate motherhood 5. Wrongful life, wrongful birth and wrongful conception
Section IV. End of life	1. End of life. Concepts and settings 2. Euthanasia and physician-assisted suicide 3. The legal meaning of death. Is there a right to die? 4. Organ and tissues transplantation
Section V. Biomedical research	1. Research with human subjects, biological samples and personal data 2. Animal experimentation 3. Research with biological agents and genetically modified organisms (GMO)

Personalized attention		5	0	5

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Case study	The knowledge of life and health issues requires the analysis both of national and international statutes and case law. Students learn into depth classical and contemporary cases, specially the rulings of the Constitutional and Supreme Courts as well as the European Court of Human Rights and the European Court of Justice Case study trains the students to identify the legal issues at stake, deliberate about them and find a solution using legal arguments Case study includes other methodologies: analysis of bibliographical and normative sources, as well as research papers.
Multiple-choice questions	Assessment of the knowledge and understanding of bibliographical and legal sources.
Guest lecture / keynote speech	Lectures ease the understanding of the special features, language, and concepts of health law, following a human rights-based approach. Furthermore, lectures are intended to clarify the meaning of the bibliographical and normative sources and the main topics
Workshop	Specific topics are studied thoroughly combining different methodologies (legal sources analysis, case study). It is expected the student takes part more actively and individually, implementing his/her knowledge and argumentative skills. Some of the workshops are given by guest and visiting professors.
Document analysis	The main legal answers to life and health issues come from international and national statutes and case law. Identifying, understanding and assessing these legal sources is an important feature to grasp the meaning of relations between biomedicine and law.

Personalized attention	
Methodologies	Description
Document analysis Workshop	Advise on selection and assessment of bibliographical and normative sources. Advise on selection of workshop issues and on deliberation on document analysis and clinical and legal cases. Students with part-time dedication and exemption from class attendance. Supervision through tutorials.

Assessment			
Methodologies	Competencies	Description	Qualification

Document analysis	A3 A4 A5 A8 A9 A10 B7 B8 B10 B3 B5 C1 C6 C8	Assessment of the ability to select, understand and communicate the meaning and main features of the bibliographical and, specially, normative sources, both in a written and oral form.	40
Multiple-choice questions	A2 A3 A4 A5 A8 A9 A10 B7 B8 B3 C1	Assessment of the knowledge and understanding of bibliographical and legal sources. The test consists of several short questions to be responded orally.	40
Workshop	A3 A4 A5 A8 A9 A10 A15 B7 B8 B10 B11 B2 B3 B5 C1 C4 C6 C7 C8	Assessment of the ability to select, understand, analyse and communicate the different issues dealt with using the bibliographical and normative (legislation and case-law) sources. Assessment of the argumentative abilities, mainly the oral ones, as well as participation in deliberations.	20

Assessment comments

1. Assessment of the second opportunity

The student can keep the grade obtained in the workshops, document analysis, and multiple-choice questions if it is equal or higher than a passing grade in each of these parts. In case of a failing grade in the workshops, he/she will be able to use the modality for students with acknowledged part-time dedication and exemption from class attendance.

2. Plagiarism or academic fraud

Student fraudulent behavior in the assessment activities, and particularly plagiarism (in the workshops and document analysis), will result in a grade of "0 (Failing grade)" in the corresponding opportunity.

3. Assessment criteria for students with acknowledged part-time dedication and exemption from class attendance.

The multiple-choice questions (40%) will have the same conditions as for the rest of the students.

The assessment of the workshops and the document analysis will consist of the delivery of written comments on the normative or bibliographic sources and a brief oral comment before the professor before the date of the exam (multiple-choice questions).
