Assessment comments

Continuous assessment (100%). Alternatively, continuous assessment (50%) + final test (50%). As for the continuous assessment, regular class attendance is required.

Furthermore, students will have to complete a series of practical tasks, which may include a combination of any of the following: text analyses, class presentations, writing essays and small research projects. The following factors will be considered in the assessment of these tasks: ability to summarize and combine information from different sources, clarity in the presentation of ideas, accuracy in the use of specialized concepts and terminology, involvement in seminars and group activities, rigor and originality in the formulation of research proposals, and, finally, the use of an appropriate academic style. The final test will consist in a series of questions related to the course contents.

The same assessment procedures will be applied in the case of students with an extra opportunity or those retaking the course. In the case of students with an extra opportunity, for the continuous assessment component, the student may be required to repeat a selection of the activities done throughout the course or to complete some extra tasks. As for those students with an official exemption of class attendance, continuous assessment will be based on their eventual completion of the assignments set through the virtual component of the course. These students must also sit the final written test (if applicable) or, alternatively, complete an equivalent task (or set of tasks) specified by the lecturers.

In the July test, students will turn in additional activities requested by the teacher, always before sitting the written exam or objective test.

Students who do not attend the written test in June or July will receive the NO PRESENTADO grade.

Students are encouraged to use recycled paper and put sustainable methods into practice. About plagiarism

In this subject, the Turnitin tool could be used in the evaluation of essays and activities. Based on the recommendations of the Xunta de Facultade, the following text is added for the students' consideration: Turnitin is an application for teachers to review parts of a text from other texts and indicate their origin. This tool can identify papers presented previously in this or other universities, including those written by the same student. If this circumstance occurs, it will be understood that it is contrary to academic honesty and will be applied to the academic regulations for evaluations, grades, masters, etc.
