Methodologies	
Methodologies	Description
Introductory activities	Students will have to revise some materials on Moodle and answer some questions as part of a warm-up activity
Guest lecture / keynote speech	The teacher will explain those issues students must know in order to attain the competences specific for this subject. Likewise, there will be some interaction in order to check whether students have obtained the abilities and knowledge they should on their own.
Workbook	Students must do some readings the teacher will upload to Moodle or some others they must find themselves in the library/on the Internet as part of their self-learning process
Collaborative learning	Students will have to work in groups to find sources and be prepared for the activities to be held in seminars and interactive sessions.
ICT practicals	Students will make some on-line (Moodle) and off-line activities

Objective test	Sstudents will sit for an exam which will consist of several types of questions (short, long, development of a particular topic) and maybe the linguistic analysis of a text fragment
Seminar	We will work on case studies and real texts in order to detect and apply all the phenomena and aspects dealt with in lectures

Personalized attention

Methodologies	Description
ICT practicals Seminar Collaborative learning	All activities imply some kind of personalised attention on the part of lecturers either in the classroom, during office hours or by e-mail. Students with special needs are kindly asked to contact the teacher as soon as possible as well as the ADI (unidad de atención á diversidade) at UDC.

Workbook	A11 A14	Students may be qualified by some activities relating to the readings they have to do either in the classroom or at home.	20

Assessment comments

Students will be evaluated throughout the course with no more than four activities as well as by means of a final exam. In order to pass this course, students must have at least a score of 4 out of 10 in the exam. They must have also handed in and passed half the required activities.

Deadlines for assignments are strict. Late arrivals will be penalised (25% of the mark), unless they are duly justified.

Pieces of work including plagiarised material will be marked with 0. To detect plagiarism, the application Turnitin could be used. This application recognises papers previously turned in by other people (or the student him/herself) at this university or other universities.

There will be a penalisation as well if the student does not show a good command of English, the one required according to the Memoria de Verificación.

The students who do not attend the official exam in January or July will be given a grade of NP (absent) if they have not handed in more than 50% of the continuous assessment activities.

Students sitting the December exam (final exam brought forward) will be assessed according to the criteria specified for the July opportunity.

July opportunity:
Students who do not pass in January will have another opportunity in July in which both the final exam (50%) and an activity (50%) will be taken into account. Students who have previously passed the activities for continuous evaluation will not have to hand it in again.

Part-time students who have been granted officially "dispensa académica" (exemption) as stated in the University regulations will be evaluated in either of the opportunities according to the criteria established for the second opportunity (July). Part-time students with "dispensa académica" must contact the teacher at the beginning of the first semester (imoskowich@udc.es).
