

		Teaching Guide				
	Identifying	Data		2019/20		
Subject (*)	Biomechanical engineering, sensoring and telemedicine Code		614522014			
Study programme	Mestrado Universitario en Bioinform	ática para Ciencias da Saúde				
		Descriptors				
Cycle	Period	Year	Туре	Credits		
Official Master's Degre	ee 1st four-month period	Second	Optional 3			
Language	SpanishEnglish					
Teaching method	Face-to-face					
Prerequisites						
Department	Ciencias Biomédicas, Medicina e Fi	sioterapiaEnxeñaría Naval e Ir	ndustrialFisioterapia, M	edicina e Ciencias Biomédicas		
Coordinador	Pereira Loureiro, Javier	E-mail	javier.pereira@u	udc.es		
Lecturers	Cudeiro Mazaira, F.Javier	E-mail	javier.cudeiro@udc.es			
	Lugris Armesto, Urbano		urbano.lugris@u	udc.es		
	Pereira Loureiro, Javier		javier.pereira@u	udc.es		
	Rivadulla Fernandez, Juan Casto		casto.rivadulla@	casto.rivadulla@udc.es		
Web	moodle.udc.es					
General description	This subject is structured in three bl	ocks. In the first block the stud	ent goes to know basic	appearances of the bioingeneiría		
	with examples in the development of órtesis hybrid. In the second block will analyse the current situation of the					
	telemedicina, the participatory medicine and the wearables devices in the current lines of research. In the last block the					
	student will know the last advances and applications of systems of brain sensorización					

	Study programme competences / results
Code	Study programme competences / results
A3	CE3 ? To analyze, design, develop, implement, verify and document efficient software solutions based on an adequate knowledge of the
	theories, models and techniques in the field of Bioinformatics
A6	CE6 - Ability to identify software tools and most relevant bioinformatics data sources, and acquire skill in their use
A7	CE7 - Ability to identify the applicability of the use of bioinformatics tools to clinical areas.
B1	CB6 - Own and understand knowledge that can provide a base or opportunity to be original in the development and/or application of ideas
	often in a context of research
B2	CB7 - Students should know how to apply the acquired knowledge and ability to problem solving in new environments or little known within
	broad (or multidisciplinary) contexts related to their field of study
B5	CB10 - Students should possess learning skills that allow them to continue studying in a way that will largely be self-directed or
	autonomous.
B6	CG1 -Search for and select the useful information needed to solve complex problems, driving fluently bibliographical sources for the field
B7	CG2 - Maintain and extend well-founded theoretical approaches to enable the introduction and exploitation of new and advanced
	technologies
B8	CG3 - Be able to work in a team, especially of interdisciplinary nature
C1	CT1 - Express oneself correctly, both orally writing, in the official languages of the autonomous community
C2	CT2 - Dominate the expression and understanding of oral and written form of a foreign language
C3	CT3 - Use the basic tools of the information technology and communications (ICT) necessary for the exercise of their profession and
	lifelong learning
C6	CT6 - To assess critically the knowledge, technology and information available to solve the problems they face to.
C8	CT8 - Rating the importance that has the research, innovation and technological development in the socio-economic and cultural progress
	of society

 Learning outcomes
 Study programme

 competences /

 results
 results

Know fundaments of the biomechanics	AJ3	BJ7	
	AJ6	20.	
	AJ7		
Know the biometric systems, the standard protocols and the communications with this type of devices in the health.	AJ3	BJ8	CJ1
	AJ6	200	001
	AJ7		
Know purchase, analyse and interpret pertinent data of sensors	AJ3	BJ8	CJ1
	AJ6	200	
	AJ7		
Know the telemedicina project examples	AJ7	BJ1	CJ8
		BJ2	
		BJ5	
		BJ6	
		BJ7	
		BJ8	
Know to do clasification the technological requirements for the deployment of projects of telemedicina	AJ7	BJ1	CJ8
		BJ2	
		BJ5	
		BJ6	
Saber identificar os requisitos tecnolóxicos para a implantación de proxectos de telemedicina.	AJ3		CJ2
	AJ6		CJ3
	AJ7		CJ6
			CJ8

Contents		
Topic Sub-topic		
Biomechanical engineering	Introduction to the biomechanics. Foundations and fields of work	
Sensorization	The participatory health. The monitoring in the field of the biomedicine	
Telemedicina	Applications of the sensors no invasivos in projects of health. Telemonitorization.	
	Teleradiology. Example of access to PACS	

	Plannin	g		
Methodologies / tests	Competencies /	Teaching hours	Student?s personal	Total hours
	Results	(in-person & virtual)	work hours	
Supervised projects	A3 A6 A7 B1 B2 B5	5	10	15
	B6 B7 B8 C1 C2 C3			
	C6 C8			
Objective test	A3 A6 A7 B1 B2 B5	5	10	15
	B6 B7 C1 C2 C6 C8			
ICT practicals	A3 A6 A7 B1 B2 B5	15	15	30
	B6 B7 B8 C1 C2 C3			
	C6 C8			
Guest lecture / keynote speech	A3 A6 A7 B1 B2 C3	5	5	10
	C6 C8			
Personalized attention		5	0	5

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

	Methodologies
Methodologies	Description
Supervised projects	Will carry out diverse practical works to put in practice the theoretical contents exposed in the face-to-face classes.

Objective test	Assesment about theoretical contents. It will be able to be suppressed by the active participation of the students in the works	
	and the ICT exercices.	
ICT practicals	Practices to realise during the classes	
Guest lecture /	Classes of theory that base the practices of the subject	
keynote speech		

	Personalized attention
Methodologies	Description
Supervised projects	The works done in group will require of personalized follow-up before his public exhibition

		Assessment	
Methodologies	Competencies /	Description	
	Results		
Supervised projects	A3 A6 A7 B1 B2 B5	Works done by groups for the application of the theoretical contents	60
	B6 B7 B8 C1 C2 C3		
	C6 C8		
Objective test	A3 A6 A7 B1 B2 B5	Assesment that will be able to be substituted by an active participation during the	40
	B6 B7 C1 C2 C6 C8	practices and the supervised work	

Assessment comments

It is necessary to obtain a minimum assessment of 50% in each block. The objective test (exam) could be changed by class projects
