General description	Esta materia permite que o alumno poida adquirir as competencias da titulación a través de traballo en empresas ou institucións públicas. O seu obxectivo é completar a formación do mestrado con estancias nestas entidades colaboradoras nas que experimentar o desenvolvemento da actividade de investigación ou profesional nunha contorna productiva. Dende a Facultade de Informática establécense convenios con distintas empresas ou institucións para a realización destas prácticas curriculares. Na web da Facultade de Informática irase informando dos convenios ya establecidos, non sendo una lista pechada senon que está aberta a novas relación en función do interese das empresas o dos estudantes. Estas prácticas terán un titor académico asignado pola comisión académica e un titor da empresa designado pola propia empresa.			

Study programme competences

Code	Study programme competences
A3	CE3 ? To analyze, design, develop, implement, verify and document efficient software solutions based on an adequate knowledge of the theories, models and techniques in the field of Bioinformatics
A6	CE6 - Ability to identify software tools and most relevant bioinformatics data sources, and acquire skill in their use
A7	CE7 - Ability to identify the applicability of the use of bioinformatics tools to clinical areas.
B1	CB6 - Own and understand knowledge that can provide a base or opportunity to be original in the development and/or application of ideas, often in a context of research
B2	CB7 - Students should know how to apply the acquired knowledge and ability to problem solving in new environments or little known within broad (or multidisciplinary) contexts related to their field of study
B3	CB8 - Students to be able to integrate knowledge and deal with the complexity of making judgements from information that could be incomplete or limited, including reflections on the social and ethical responsibilities linked to the application of their skills and judgments
B4	CB9 - Students should know how to communicate their findings, knowledge and latest reasons underpinning them to specialized and non-specialized audiences in a clear and unambiguous way
B5	CB10 - Students should possess learning skills that allow them to continue studying in a way that will largely be self-directed or autonomous.
B8	CG3 - Be able to work in a team, especially of interdisciplinary nature
C3	CT3 - Use the basic tools of the information technology and communications (ICT) necessary for the exercise of their profession and lifelong learning
C5	CT5 - Understand the importance of entrepreneurial culture and know the means available to enterprising people
C6	CT6 - To assess critically the knowledge, technology and information available to solve the problems they face to.
C7	CT7 ? To maintain and establish strategies for scientific updating as a criterion for professional improvement.
C8	CT8 - Rating the importance that has the research, innovation and technological development in the socio-economic and cultural progress of society

Learning outcomes

Learning outcomes	Study programme competences		
Poseer experiencia real sobre a actividade de investigación ou profesional dentro das empresas ou institucións públicas no ámbito da bioinformática e a informática da saúde	AJ3	BJ1	CJ3
	AJ6	BJ2	CJ5
	AJ7	BJ3	CJ6
		BJ4	CJ7
		BJ5	CJ8
		BJ8	

Contents	
Topic	Sub-topic
Prácticas en empresa	As prácticas realízanse en empresas e institucións do ámbito da bioinformática e tecnoloxía aplicada as ciencias da vida e da saúde

Planning				
Methodologies / tests	Competencies	Ordinary class hours	Student's personal work hours	Total hours
ICT practicals	A3 A6 A7 B1 B2 B3 B4 B5 B8 C3 C5 C6 C7 C8	0	70	70
Personalized attention		5	0	5

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
ICT practicals	As prácticas van a depender do tipo de centro onde se leva a cabo o traballo que dependerá tamén do perfil do estudante.

Personalized attention	
Methodologies	Description
ICT practicals	Débase destacar particularmente a importancia do papel do profesor tutor, esencial para un axeitado aproveitamento da estancia do estudante, así como para facilitar a relación da Facultade cas empresas colaboradoras.

Assessment			
Methodologies	Competencies	Description	Qualification

ICT practicals	A3 A6 A7 B1 B2 B3 B4 B5 B8 C3 C5 C6 C7 C8	O estudante informará ao tutor académico das tarefas que está a realizar. Ao rematar a práctica, o estudante entregará un informe donde enumere e explique en detalle as tarefas realizadas, a contorna tecnolóxica utilizada -ferramentas, estándares e metodoloxías-, evitando as cuestións que poidan considerarse confidenciais. A extensión recomendada é de aproximadamente 3 páxinas. O tutor profesional entregará un informe avaliando a actividade do estudante. O tutor académico avaliará a práctica e emitirá un informe final: - Valoración da memoria: 50% - Valoración do tutor profesional: 50% Estas porcentaxes é orientativa e poderá modificarse en función do criterio do tutor	100
