| General description | | | | |

| | Study programme competences |
|------|---|
| Code | Study programme competences |
| A1 | CE1 - To know and apply the concepts, methodologies and technologies of image processing |
| АЗ | CE3 - To know and apply the concepts, methodologies and technologies of image and video analysis |
| A7 | CE7 - To understand and apply the fundamentals of medical image acquisition, processing and analysis |
| B2 | CB7 - That students are able to apply their acquired knowledge and problem-solving skills in new or unfamiliar environments within |
| | broader (or multidisciplinary) contexts related to their area of study |
| В3 | CB8 - That students are able to integrate knowledge and deal with the complexity of making judgements based on information that is |
| | incomplete or limited, including reflections on social and ethical responsibilities linked to the application of their knowledge and judgements |
| B5 | CB10 - That students possess the learning skills to enable them to continue studying in a largely self-directed or autonomous manner |
| B8 | CG3 - Ability to develop computer vision systems depending on existing needs and apply the most appropriate technological tools |
| В9 | CG4 - Ability to critically analyze and rigorously evaluate technologies and methodology |
| B12 | CG7 - Ability to learn autonomously for specialization in one or more fields of study |
| C4 | CT4 - Ability to understand the meaning and application of the gender perspective in different areas of knowledge and professional |
| | practice with the aim of achieving a more just and equal society |
