| Mixed objective/subjective test | A4 A5 B3 C7  | <p>Both in the FIRST OPPORTUNITY and in the SECOND OPPORTUNITY it will be MANDATORY to pass a written test that will make up 60% of the final overall grade. To pass this mixed test, students have to get at least 2.4 points out of 6 (i.e. 40% of the maximum mark of the Mixed Test).</p> <p>- Maximum grade: 6.0 points<br/>- Minimum grade: 2.4 (out of 6.0)</p> | 60            |
| Laboratory practice             | A4 C2 C3     | <p>Students will have to do several practical exercises that will be rated.</p> <p>- Maximum grade: 4.0 points<br/>- Minimum grade: not required</p>                                                                                                                                                                                                                   | 40            |

## Assessment comments

Students must obtain at least 5 points (out of 10) after summing their grades corresponding to the mixed test plus the laboratory-practice grade. Students must obtain at least 40% of the maximum grade in the mixed test (final exam). Otherwise, they would not pass the subject even if the final grade (considering both practice and mixed tests) were  $\geq 5$ . In such case, the maximum final grade would be set to 4.9, and consequently, the subject will be considered as "NON-PASSED".

- First opportunity:

Mixed test: [60%]: Mandatory: Apart from the final mixed-test, for this course we consider the option of performing "partial mixed-tests" associated to the contents of each block/part of the subject. Those students that obtain a grade  $\geq 2.4$  (out of 6) in the "partial mixed-tests" will be assumed to pass the subject "via partial-tests", and will not perform the final "mixed-test" corresponding to this 1st opportunity. Laboratory-practice: [40%]: Optional: Students who did not perform any (one or more) of the evaluable tests corresponding to the "laboratory practice" part from September to January, (for example, those who did not attend the class on the day of the test), will receive a "zero" grade in the corresponding test. Yet, they are allowed to attend the final test/exam (Mixed objective/subjective test) and could still pass the subject in the first opportunity. - Second opportunity: During the second opportunity it is possible to reach 100% of the maximum grade both in the Laboratory-practice part and in the mixed test. Mixed test: [60%]: Mandatory: The grade obtained in the first opportunity is not kept. Laboratory-practice: [40%]: Optional: The grades of the first opportunity are retained. However, it is possible to take an optional practice exam (along with the mixed test) to recover the maximum grade (this means discarding the ?Laboratory-practice? grade achieved in the first opportunity). Attention to part-time students: In case that: (a) they could not attend to the (scheduled) classes corresponding to their group and they miss any of the existing tests ("practical tests" or "partial mixed tests"), and (b) provided that they notified that issue with time enough to re-schedule their test within a different group; we will try to allow them to join a different group so that they could do the corresponding "test" in a different date.
