|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Methodologies                  | Description                                                                                                                                                                                                                                                                                                                                                                               |
| Laboratory practice            | The university virtual platform will be used as a basis to publish all the required material to do the laboratory practices. In the laboratory the students must deepen certain theoretical issues of the subject. In order to achieve this objective, there will be Java programming laboratories and laboratories based on network emulation/simulation and/or protocol analyzer tools. |
| Seminar                        | Through the seminars (TGRs) we will deepen certain issues of the subject, both theoretical and practical, in a more personalized way, with a more specific treatment and solving student's doubts and matters individually.                                                                                                                                                               |
| Objective test                 | At the end of the four-month period there will be an exam where the student must prove his knowledge of the subject.                                                                                                                                                                                                                                                                      |
| Guest lecture / keynote speech | The university virtual platform will be used as a basis to publish all the required material to follow the lectures. During the lectures the theoretical concepts of the subject will be presented, encouraging the student participation.                                                                                                                                                |

| Personalized attention         |                                                                                                                                                                                                                                                                                                                                                                                                 |

#### Assessment comments

The laboratory practices and the seminars are part of the subject continuous evaluation as therefore can not be recovered in the second opportunity nor in the December call. Fraudulent realization of the tests or evaluation activities, once verified, will directly imply a failing grade of "0" in the corresponding call, invalidating any grades obtained for all the evaluation activities for the extraordinary call. The part-time students will be helped in the timetable election for laboratories and seminars.
