Web				
General description	O curso plantéase como unha introducción ao proxecto urbano de espacio libre-público, mediante a achega ao medio ambiente e á sostibilidade como referencias clave para o seu diseño, a importancia do trazado dos servizos urbanísticos, o coñecemento das condicións normativas, de accesibilidade e mobilidade, así como unha aproximación á súa construción. A asignatura estrutúrase en dúas partes: teoría e práctica, estreitamente relacionadas e que se desenrolan en paralelo ao longo do curso. A avaliación do alumno dependerá, ademáis da súa participación na materia específica, na que se estima unha asistencia mínima obligatoria dun 80%, da participación e entregas realizadas no conxunto do Taller 6, a onde se vincula a parte práctica principal da asignatura.			

Study programme competences

Code	Study programme competences
A34	Ability to design, implement and develop sketches and drafts, concept designs, developed designs and technical designs (T)
A35	Ability to design, implement and develop urban projects (T)
A37	Ability to develop functional programs for buildings and urban spaces (T)
A39	Ability to remove architectural barriers (T)
A41	Ability to solve the passive environmental conditioning, including thermal and acoustic insulation, climate control, energy efficiency and natural lighting (T)
A42	Ability to catalogue the built and urban heritage and plan its protection (T)
A45	Ability to design and execute urban layouts and urbanization, gardening and landscape design projects (T)
A46	Ability to apply standards and urban regulations
A51	Adequate knowledge of the methods of studying the social requirements, living conditions, habitability and basic housing programmes
A52	"Adequate knowledge of ecology, sustainability and the principles of conservation of energy and environmental resources. "
A53	Adequate knowledge of the architectural, urban and landscape traditions of Western culture, as well as their technical, climatic, economic, social and ideological foundations.
A55	Adequate knowledge of the relationship between cultural patterns and social responsibilities of the architect
A56	Adequate knowledge of the foundations of vernacular architecture
A58	Adequate knowledge of the methodological foundations of territorial, metropolitan and urban planning.
A59	Knowledge of the mechanisms of development and management of urban planning at all scales
A63	Development, presentation and public review before a university jury of an original academic work individually elaborated and linked to any of the subjects previously studied
B2	Students can apply their knowledge to their work or vocation in a professional way and have competences that can be displayed by means of elaborating and sustaining arguments and solving problems in their field of study
B3	Students have the ability to gather and interpret relevant data (usually within their field of study) to inform judgements that include reflection on relevant social, scientific or ethical issues
B4	Students can communicate information, ideas, problems and solutions to both specialist and non-specialist public

B5	Students have developed those learning skills necessary to undertake further studies with a high level of autonomy
B6	Knowing the history and theories of architecture and the arts, technologies and human sciences related to architecture
B8	Knowing the urbanism and techniques applied in the planning process
B11	"Knowing the industries, organizations, regulations and procedures involved in translating design concepts into buildings and integrating plans into planning "
B12	Understanding the relationship between people and buildings and between these and their environment, and the need to relate buildings and the spaces between them according to the needs and human scale
C1	Expressing themselves correctly, both orally and in writing, in the official languages of the autonomous region
C3	Using basic tools of information technology and communications (ICT) necessary for the exercise of the profession and for lifelong learning
C4	Exercising an open, educated, critical, committed, democratic and caring citizenship, being able to analyse facts, diagnose problems, formulate and implement solutions based on knowledge and solutions for the common good
C5	Understanding the importance of entrepreneurship and knowing the means available to the entrepreneur
C6	Critically evaluate the knowledge, technology and information available to solve the problems they must face
C7	Assuming as professionals and citizens the importance of learning throughout life
C8	Assessing the importance of research, innovation and technological development in the socio-economic advance of society and culture

Learning outcomes			
Learning outcomes		Study programme competences	
The student must know benefits that are demanded in the design and construction of public space, recognizing the categories that can be classified. You should know to do the necessary analysis of the problem posed, developing a catalogue of types of recognized spaces, in particular those related to the general concepts of street, square and game.	A34	B2	C1
	A35	B3	C3
	A37	B4	C4
	A39	B5	C5
	A41	B6	C6
	A42	B8	C7
	A45	B11	C8
	A51	B12	
	A52		
	A53		
	A55		
	A56		
	A58		
The student must meet the applicable regulation in the public space project, knowing its benefits as a guarantee of adequate conditions of accessibility and service. You should know to find the right solution and demonstrate that your project meets these conditions.	A34	B2	C1
	A35	B3	C3
	A37	B4	C4
	A39	B5	C5
	A45	B6	C6
	A46	B8	C7
	A52	B11	C8
	A53	B12	
	A58		
	A59		
	A63		

The student must know environmental conditions affecting the public espazcio project, understanding the relationship between vegetation and architecture as an important part of their value and quality. You should know give adequate solutions and quantify the environmental value of their project.	A34	B2	C1
	A35	B3	C3
	A39	B4	C4
	A42	B5	C5
	A45	B6	C6
	A51	B8	C7
	A52	B11	C8
	A53	B12	
	A55		
	A58		
	A59		
	A63		
Student must reach the competition to lead and integrate into a multidisciplinary team capable of developing projects of public space, in scales ranging, from management strategy to the urbanization project, including the detail of its construction and the understanding of the elements of service.	A34	B2	C1
	A35	B3	C3
	A37	B4	C4
	A39	B5	C5
	A42	B8	C6
	A45	B11	C7
	A46	B12	C8
	A52		
	A53		
	A55		
	A58		
	A59		
	A63

Methodologies	
Methodologies	Description
Workshop	Work of analysis, spatial planning and urban design. It develops linked to Workshop 5, which defines the contents of the practice, objectives, documentation and delivery.
Field trip	It is considered essential knowledge about the area being analyzed, so the visit to the site chosen for the job is essential too.
Directed discussion	The results of the workshop will be the subject of discussions directed along the course.
Introductory activities	Presentation of the activities to be carried out in the course and home search from the description of the basic documentary sources.
Objective test	Test used to assess knowledge, abilities, skills, performance, skills, attitudes, intelligence, etc., applicable both to evaluate diagnostic, formative, or additive, and can contain both written multiple-choice questions written short, long response and graphic mode.
Supervised projects	Jobs in search of information, analysis or summary in parallel with the work of workshop.
Multiple-choice questions	Objective test consisting of direct questions with several response options that only one of them is valid.
Document analysis	Technical methodology in which relevant audiovisual and bibliographic documents are used for the subject of matter, forming part not only approximation works to solve solution but also the relevant content of the same.
Diagramming	It consists in the elaboration of synthesis of the main contents of the work, being an optimal resource that facilitates understanding of the reality and the explanation of the proposals.
Student portfolio	Overview graphic and written documents that explain specific parts of any specific work done as the models that are made in the course or the putting in order of the urban information.
ICT practicals	Control of the individual work of the workshop through ICT practices.
Workbook	Throughout the course are given a series of readings of support that are helpful to facilitate understanding and assimilation of knowledge and to establish guidelines and open up possibilities to guide the work in the workshop.
Guest lecture / keynote speech	The various issues relevant to the workshop sessions will be subject to master.

Personalized attention	
Methodologies	Description

Workbook Workshop Field trip Directed discussion Supervised projects	It will focus on monitoring the work done by students, individually, with which it intended to apply the knowledge outlined in the theory.

Assessment			
Methodologies	Competencies	Description	Qualification
Workshop	A34 A35 A37 A39 A41 A42 A45 A46 A51 A52 A53 A55 A56 A58 A59 A63 B2 B3 B4 B5 B6 B8 B11 B12 C1 C3 C4 C5 C6 C7 C8	The final work will be assessed in its analytical aspects, planning and design. The practical work will be related in part with the practice of Workshop 6, so that both the text and the deliveries will be part of the contents thereof. Deliveries will be unique and student assessment will be essential to have participated and delivered completely the work of the workshop.	50
Objective test	A34 A35 A37 A39 A41 A45 A46 A51 A52 A53 A55 A58 A59 B2 B5 B6 B8 B11 C1 C3 C7 C8	Instrumental knowledge contained in the syllabus of expository teaching, theoretical and practical of course will be assessed by an objective test which can contain both written multiple-choice questions written short, long response and graphic form.	50

Assessment comments
It's a Continuous Assessment, controlled through class attendance completed with the completion of theoretical and practical tests that allow to check the student absorbed the conceptual content and procedure of the subject. Evaluation of students will depend, in addition to its participation in the specific field, in which it is estimated a compulsory minimum attendance of 80%, participation and supplies made in e set of Workshop 6, where it binds the main practical part of the course. Both the non-realization of the proposed tests and breach of assistance delivery will result in a failed as a qualification of the call. In any case, the final grade of the course will be valued with the average resulting from both written tests grades exams as practice theoretical proofs. The knowledge of the student must be always in any of them above 50%.Evaluation of the student in extraordinary calls will take place by means of a single examination, while those students that do not exceed the part corresponding to the theoretical and practical tests, must also prove the correction and completion of the same. Evaluation of student in successive registrations held by the same procedure described above.Teaching mobility programmes students will adapt to teaching and special protected works, as well as testing and evaluation tests.
