## Study programme competences

| Code | Study programme competences                                                                                                                                                                                                                                                    |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| A2   | CE2 - Capacidade para a dirección, organización e operación das actividades obxecto das instalacións marítimas no ámbito da súa especialidade.                                                                                                                                 |
| A13  | CE13 - Llevar a cabo automatizacións de procesos e instalacións marítimas.                                                                                                                                                                                                     |
| A14  | CE14 - Avaliación cualitativa e cuantitativa de datos e resultados, así como a representación e interpretación matemáticas de resultados obtidos experimentalmente.                                                                                                            |
| A15  | CE15 - Manexar correctamente a información procedente da instrumentación e sintonizar controladores, no ámbito da súa especialidade.                                                                                                                                           |
| A16  | CE16 - Ensambalar e realizar tarefas básicas de mantemento e reparación de equipos informáticos. Instalar e manexar sistemas operativos e aplicacións informáticas. Instalar e realizar as tarefas básicas de xestión de redes de ordenadores, no ámbito da súa especialidade. |
| A17  | CE17 - Modelizar situacións e resolver problemas con técnicas ou ferramentas físico-matemáticas.                                                                                                                                                                               |
| A18  | CE18 - Redacción e interpretación de documentación técnica.                                                                                                                                                                                                                    |
| A20  | CE20 - Ser capaz de identificar, analizar e aplicar os coñecementos adquiridos nas distintas materias do Grao, a unha situación determinada formulando a solución técnica máis axeitada dende o punto de vista económico, ambiental e de seguridade.                           |
| A67  | CE57 - Facer funcionar os ordenadores e redes informáticas a bordo dos buques                                                                                                                                                                                                  |
| A69  | CE59 - Manter e reparar os sistemas de control automático da máquina propulsora principal e das máquinas auxiliares                                                                                                                                                            |
| B2   | CT2 - Resolver problemas de forma efectiva.                                                                                                                                                                                                                                    |
| B5   | CT5 - Traballar de forma colaboradora.                                                                                                                                                                                                                                         |
| B8   | CT8 - Versatilidade.                                                                                                                                                                                                                                                           |
| B9   | CT9 - Capacidade para a aprendizaxe de novos métodos e teorías, que lle doten dunha gran versatilidade para adaptarse a novas situacións.                                                                                                                                      |
| C3   | C3 - Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.                                                                                           |
| C5   | C5 - Entender a importancia da cultura emprendedora e coñecer os medios ao alcance das persoas emprendedoras.                                                                                                                                                                  |
| C7   | C7 - Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.                                                                                                                                                                                          |
| C9   | CB1 - Demostrar que posúen e comprenden coñecementos na área de estudo que parte da base da educación secundaria xeneral, e que inclúe coñecementos procedentes da vangardía do seu campo de estudo                                                                            |
| C10  | CB2 - Aplicar os coñecementos no seu traballo ou vocación dunha forma profesional e poseer competencias demostrables por medio da elaboración e defensa de argumentos e resolución de problemas dentro da área dos seus estudos                                                |
| C11  | CB3 - Ter a capacidade de reunir e interpretar datos relevantes para emitir xuízos que inclúan unha reflexión sobre temas relevantes de índole social, científica ou ética                                                                                                     |
| C12  | CB4 - Poder transmitir información, ideas, problemas e solucións a un público tanto especializado como non especializado.                                                                                                                                                      |

|     |                                                                                                                                        |
|-----|----------------------------------------------------------------------------------------------------------------------------------------|
| C13 | CB5 - Ter desenvolvido aquelas habilidades de aprendizaxe necesarias para emprender estudos posteriores con un alto grao de autonomía. |
|-----|----------------------------------------------------------------------------------------------------------------------------------------|

|--------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Methodologies                  | Description                                                                                                                                                                                                                                                   |
| Laboratory practice            | A series of exercises will be proposed so that the student learns to develop simple algorithms. Thus, the student will be able to solve the problems that arise to him, using for this the control structures and basic data types of a programming language. |
| Supervised projects            | A supervised project, related to his professional field, will be proposed. It will allow the student to integrate the knowledge acquired not only in this subject, but also in other subjects of the degree.                                                  |
| Guest lecture / keynote speech | The lecturer will describe the contents of each topic, relating them to the concepts previously acquired. Then he will develop the theoretical contents using slides and practical examples.                                                                  |

| Personalized attention         |                                                                                                                                                                                       |
|--------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Methodologies                  | Description                                                                                                                                                                           |
| Guest lecture / keynote speech | In the laboratory practice sessions, the students will be advised in the resolution of the proposed exercises.                                                                        |
| Laboratory practice            | Students will also be advised during the development of the supervised project that has to be carried out throughout the course.                                                      |
| Supervised projects            | In the lectures, the professor will resolve the doubts that arise so that the student can assimilate the concepts studied and relate them correctly to those seen in previous topics. |

#### Assessment comments

The evaluation criteria present in table A-III/6 of the STCW Code, and included in the Quality Assurance System, will be taken into account when designing and carrying out the evaluation.
