General description	Wastewater treatment has becon	ne a fundamental too	ol in water man	agement. Indeed, the u	ultimate aim of the Water	
	Framework Directive (2000/60/E0	C) is to achieve the	limination of h	azardous substances a	and contribute to achieving	
	concentrations near background	values for naturally of	occurring subst	ances in both freshwat	er and marine ecosystems. Th	
	main purpose of this subject is to	help students identi	y and evaluate	e risk factors and proce	sses involved in water pollution	
	and water treatment.					
Contingency plan	1. Modifications to the contents					
	- No changes will be made					
	2. Methodologies					
	*Teaching methodologies that are	e maintained				
	*Teaching methodologies that are - Lectures (taken into account for					
		r grading)				
	- Lectures (taken into account for	r grading) for grading)				
	- Lectures (taken into account for -Workshops (taken into account f	r grading) for grading) e modified	platform Team	ns for doing exercises v	vith the students)	
	- Lectures (taken into account for -Workshops (taken into account for *Teaching methodologies that are	r grading) for grading) e modified er will use the online	platform Team	ns for doing exercises v	vith the students)	
	- Lectures (taken into account for -Workshops (taken into account for *Teaching methodologies that are - Laboratory practices (the teacher	r grading) for grading) e modified er will use the online attention to students		·	vith the students)	
	- Lectures (taken into account for -Workshops (take	r grading) for grading) e modified er will use the online attention to students y the students will be	solved on a d	aily basis.	,	
	- Lectures (taken into account for -Workshops (taken into account for *Teaching methodologies that are - Laboratory practices (the teached 3. 	- Lectures (taken into account for -Workshops (taken into account for -Workshops (taken into account for -Teaching methodologies that are -Laboratory practices (the teached). Mechanisms for personalized a -EMAIL: Doubts and questions by -TEAMS: Students will receive personal control of the	r grading) for grading) e modified er will use the online attention to students y the students will be ersonalized attention used to provide suppo	solved on a dather through the Tentral to students	aily basis. eams platform at least of when preparing their re	once a week or by appointmen ports or doing exercises.	
	- Lectures (taken into account for -Workshops (taken into account for -Workshops (taken into account for -Teaching methodologies that are - Laboratory practices (the teached 3. Mechanisms for personalized a -EMAIL: Doubts and questions by -TEAMS: Students will receive per	r grading) for grading) e modified er will use the online attention to students y the students will be ersonalized attention used to provide supponitored on a weekly be	solved on a dather through the Tentral to students	aily basis. eams platform at least of when preparing their re	once a week or by appointmen ports or doing exercises.	
	- Lectures (taken into account for -Workshops (taken into account for -Laboratory practices (the teached). Mechanisms for personalized and -EMAIL: Doubts and questions by -TEAMS: Students will receive per MOODLE: This platform will be up Advances of students will be more	r grading) for grading) e modified er will use the online attention to students y the students will be ersonalized attention used to provide suppo- nitored on a weekly be	solved on a dathrough the Teort to students assis, and ques	aily basis. eams platform at least o when preparing their re stions and doubts will b	once a week or by appointmen eports or doing exercises. e solved by appointment.	
	- Lectures (taken into account for -Workshops (take	r grading) for grading) e modified er will use the online attention to students y the students will be ersonalized attention used to provide suppo- nitored on a weekly be	solved on a dathrough the Teort to students assis, and ques	aily basis. eams platform at least o when preparing their re stions and doubts will b	once a week or by appointmen eports or doing exercises. e solved by appointment.	
	- Lectures (taken into account for -Workshops (take	r grading) for grading) e modified er will use the online attention to students y the students will be ersonalized attention used to provide suppo- nitored on a weekly be ending will be adapted to eface teaching.	solved on a dathrough the Teort to students assis, and ques	aily basis. eams platform at least o when preparing their re stions and doubts will b	once a week or by appointment eports or doing exercises. e solved by appointment.	

	Study programme competences
Code	Study programme competences
A19	Knowledge of advanced water treatment with different conclusions: depuration, re-use, purification, elimination of nutrients and
	regeneration treatments
A23	Fundamental knowledge of energy consumption and its environmental implications inside a development sustainable

A25	Knowledge and understanding of water in different situations: the working of ecosystems, environmental factors with the purpose of to
	make an inventory of medium, applying the methodology to value the impact and its use in studies and evaluations of the environmental
	impact.
B1	To resolve problems effectively
B2	To apply critical thinking, logic and creativity
В3	To work individually with initiative
B4	To communicate effectively in work surroundings
B5	Continuous recycling of knowledge in a general perspective in a global situation of water engineering
В6	Understanding of the need to analyse history to understand the present
В7	Facility to integrate in multidiscipline teams
B8	Capacity to organize and plan
В9	Capacity for analysis, synthesis and structure of information and ideas
C1	To understand the importance of the enterprising culture and to know the means at the reach of the enterprising people
C2	To value knowledge critically, technology and available information to resolve problems that they will face
СЗ	To assume as a professional and citizen the importance of learning throughout life
C4	To value the importance of the investigation, innovation and technology development in the social ?economic advance and cultural in
	society
C5	To posses and understand knowledge that gives a base or oportunity to be original in the development and for applications of ideas, often
	in the context of investigation
C6	The students must be able to apply the acquired knowledge and their capacity to resolve problems in new surrandings or not well known
	within wider contexts (or multidiscipline) related with the study area
C7	The students must be able to integrate knowledge and to affront the complexity to formulate judgements from information that, been
	incomplete or limited, include reflexions about social responsabilities and ethics related to the application of the knowledge and judments
C8	The students must be able to comunicate their conclusions, knowledge and the last reasons that support them, to spezialated publics and
	not spezialated in a clear and unambiguous way.
C9	The student must possess the learning ability with permits them to continues to study in a manner wich will be in a great measure self
	directed and individual

Learning outcomes				
Learning outcomes		Study programme		
	competences			
The learning outcomes address water treatment and how it influences the normal functioning of freshwater ecosystems.	AC19	BC1	CC1	
	AC23	BC2	CC2	
	AC25	BC3	CC3	
		BC4	CC4	
		BC5	CC5	
		BC6	CC6	
		BC7	CC7	
		BC8	CC8	
		BC9	CC9	

Contents			
Topic	Sub-topic		
Water, energy and sustainable development. Life cycle	Water demand		
analysis	Water footprint and carbon footprint		
	Greenhouse gases emission		
Water reuse as an example of sustainable initiative	Water reuse options		
	Treatment options and their energy requirements		
	Life cycle analysis of water reuse		

Renewable energies to face water scarcity	The problem of the water and the energy
Ç	Technologies based on renewable energies for freshwater production
Water and energy: two closely-related concepts	Introduction
,	The use of energy to obtain the required water
	Energy obtained from water
	The use of water to obtain energy
The functioning of freshwater ecosystems	Lentic systems
	Lotic systems
Freshwater biodiversity. Types of aquatic organisms	Microbes and plants
The second of th	Animals
Effects of pollutants on aquatic ecosystems	Suborganismal effects
and the political of a quality coccycles.	Supraorganismal effects
The use of bioindicators to assess freshwater quality	Bioindicators recommended by the Water Framework Directive
Chemical contaminants of water	Types
	Standards
	Problems
	Health Effects and Impact on the environment
Chemical treatments	Coagulation-precipitation
	Oxidation reduction
	Ion exchange
	Disinfection
	High-service pumping
	Water plant residuals managment
Types of water contamination	Domestic wastewater
,	Livestock Wastewater
	Industrial wastewater
	Municipal waste water
	Agricultural pollution
	Water from urban runoff
Analytical methods for the determination of physicochemical	Analytical methods
parameters	

	Planning			
Methodologies / tests	Competencies	Ordinary class	Student?s personal	Total hours
		hours	work hours	
Guest lecture / keynote speech	A19 A23 A25 B5 B6	25	25	50
	B7 B9 C2 C3			
Laboratory practice	A19 A25 B1 B2 B3 B4	25	25	50
	B7 B8 B9 C2 C3 C4			
	C5 C6 C9			
Workshop	A19 A23 B2 B4 B5 B6	10	10	20
	B7 B8 B9 C1 C2 C3			
	C4 C5 C6 C7 C8			
Personalized attention		30	0	30

Methodologies			
Methodologies	Methodologies Description		
Guest lecture /	Regular lectures where the main theoretical contents of the subject are regarded		
keynote speech			

Laboratory practice	The laboratory practice will be done mainly in the chemistry laboratory. Practices will illustrate chemical concepts and the		
	students wil learn important laboratory techniques		
Workshop	During the workshop discussions will be organised and the students will be asked toproduce assays or reports in different		
	formats		

Personalized attention			
Methodologies	Description		
Laboratory practice	Personalized attention to be provided mainly for laboratory practices and workshops		
Workshop			

Assessment			
Methodologies	Competencies	npetencies Description	
Laboratory practice	A19 A25 B1 B2 B3 B4	Assesment will be based mostly on claass assignments. Attendance to laboratory	40
	B7 B8 B9 C2 C3 C4	classes and technical visits will be taken into account for the final mark	
	C5 C6 C9		
Workshop	A19 A23 B2 B4 B5 B6	Attendance to preparatory seminars and the work developed in the workshops will be	20
	B7 B8 B9 C1 C2 C3	considered for the final mark	
	C4 C5 C6 C7 C8		
Guest lecture /	A19 A23 A25 B5 B6	The knowledge of the concepts developed at the magistral lectures will be assesed	40
keynote speech	B7 B9 C2 C3	and considered for the final mark. Assessment methodologies might include oral	
		presentations, written exams, analysis of scientific papers, etc.
