| General description | Basis of flow in porous and fractured | d media (physical hydrogeolo | gy) in both saturated an | d unsaturated |
| | conditions. Interactions of surface w | ater and groundwater. Hydro | geochemical principles | and rockwater |
| | interaction (chemical hydrogeology, transport in porous media), hydrodynamics test of aquifers | | | |
| | (slug tests, pumping tests,?), constru | uctive aspects of wells, deve | opment and exploitatior | n of aquifers |

| | Study programme competences |
|------|---|
| Code | Study programme competences |
| A15 | General vision and balanced of the basic aspects and application of underground hydrologic from the needs of civil engineering. Capacity |
| | to Project or interpret the different hydraulic trials of hydrodynamic characterization, interpret hydrogeological maps and know the |
| | constructive aspects of the water uptake |
| B1 | To resolve problems effectively |
| B2 | To apply critical thinking, logic and creativity |
| B3 | To work individually with initiative |
| B4 | To communicate effectively in work surroundings |
| B5 | Continuous recycling of knowledge in a general perspective in a global situation of water engineering |
| B6 | Understanding of the need to analyse history to understand the present |
| B7 | Facility to integrate in multidiscipline teams |
| B8 | Capacity to organize and plan |
| B9 | Capacity for analysis, synthesis and structure of information and ideas |
| C1 | To understand the importance of the enterprising culture and to know the means at the reach of the enterprising people |
| C2 | To value knowledge critically, technology and available information to resolve problems that they will face |
| C3 | To assume as a professional and citizen the importance of learning throughout life |
| C4 | To value the importance of the investigation, innovation and technology development in the social ?economic advance and cultural in |
| | society |
| C5 | To posses and understand knowledge that gives a base or oportunity to be original in the development and for applications of ideas, often |
| | in the context of investigation |
| C6 | The students must be able to apply the acquired knowledge and their capacity to resolve problems in new surrandings or not well known |
| | within wider contexts (or multidiscipline) related with the study area |
| C7 | The students must be able to integrate knowledge and to affront the complexity to formulate judgements from information that, been |
| | incomplete or limited, include reflexions about social responsabilities and ethics related to the application of the knowledge and judments |
| C8 | The students must be able to comunicate their conclusions, knowledge and the last reasons that support them, to spezialated publics and |
| | not spezialated in a clear and unambiguous way. |
| C9 | The student must possess the learning ability with permits them to continues to study in a manner wich will be in a great measure self |
| | directed and individual |

| Learning outcomes | | | |
|--|-------|----------|------|
| Learning outcomes | Study | / progra | amme |
| | cor | npeten | ces |
| Overview of basic and applied aspects of hydrogeology from needs of civil engineering. Ability to design and interpret the | AC15 | BC1 | CC1 |
| hydraulics tests and hydrodynamic characterization of medium, interpreting hydrogeological maps and constructive ways of | | BC2 | CC2 |
| sources | | BC3 | CC3 |
| | | BC4 | CC4 |
| | | BC5 | CC5 |
| | | BC6 | CC6 |
| | | BC7 | CC7 |
| | | BC8 | CC8 |
| | | BC9 | CC9 |

| | Contents | |
|--------------------------------------|---|--|
| Торіс | Sub-topic | |
| Introduction to the Hydrologic Cycle | Components | |
| | Evapotranspiration and potencial Evapotranspiration | |
| | Infiltration and recharge | |
| | Baseflow | |
| Geologic materials | Continental environments:erosion, transportation and deposition | |
| | Kind of depositis: fluvial, eolian, lacustrine and galcial | |
| | Uplift, diagenesis and erosion | |
| | Tectonism and the formation of fractures | |
| Ground water movement | Basic concepts | |
| | Darcy's experimental law and field extensions | |
| | Propierties: porosity and hydraulic conductivity | |
| | Filed Mapping | |
| | Flow in fractured rocks | |
| Main equations of flow | Conservation of fluid mass | |
| | The storage properties of porous media | |
| | Boundary conditions and flow nets | |
| Flow in the unsaturated zone | Richards 's equation | |
| | Unsaturated flow in fractured rocks | |
| Solute and particle transport | Advection | |
| | Basic concepts of dispersion: diffusion and mechanical dispersion | |
| Principles of aqueous geochemistry | Aqueous systems | |
| | Equilibrium versus kinetic descriptions | |
| | Equilibrium models of reaction | |
| | Kinetcis reactions | |
| | Ground water composition | |
| Chemical reactions | Homogeneous reactions: Acid-base reactions, complextion reactions, | |
| | oxidation-reductions reactions | |
| | Heterogeneous reactions: dissolution/precipitation, reactions on surfaces | |
| Saline water/ Sweet Water interface | Saline intrusion | |
| | Methods | |
| Hydraulic testing | Conventional hydraulic testing | |
| | Single borehole test | |
| | hydraulic testing in fractured or low permeability rocks | |
| | Others methods of testing | |

| Ground water as a resource | Land subsidence |
|----------------------------|--------------------|
| | Coastal aquifers |
| | drainage on slopes |
| | road drainge |
| | dams |

| | Planning | | | |
|--------------------------------|--------------------|----------------|--------------------|-------------|
| Methodologies / tests | Competencies | Ordinary class | Student?s personal | Total hours |
| | | hours | work hours | |
| Seminar | A15 B1 B2 B3 B4 B5 | 30 | 30 | 60 |
| | B6 B7 B8 B9 C1 C2 | | | |
| | C3 C4 C5 C6 C7 C8 | | | |
| | C9 | | | |
| Guest lecture / keynote speech | A15 B1 B2 B3 B4 B5 | 30 | 30 | 60 |
| | B6 B7 B8 B9 C1 C2 | | | |
| | C3 C4 C5 C6 C7 C8 | | | |
| | C9 | | | |
| Personalized attention | | 30 | 0 | 30 |

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

| | Methodologies |
|-----------------|--|
| Methodologies | Description |
| Seminar | Practical lectures related to the theoretical aspects regarded at the magistral lectures |
| Guest lecture / | Regular lectures where the main theoretical contents of the subjects are regarded |
| keynote speech | |

| | Personalized attention |
|-----------------|---|
| Methodologies | Description |
| Guest lecture / | Pernonalized attention to be provided for the semminars |
| keynote speech | |
| Seminar | |

| | | Assessment | |
|-----------------|--------------------|--|---------------|
| Methodologies | Competencies | Description | Qualification |
| Guest lecture / | A15 B1 B2 B3 B4 B5 | The knowledge of the concepts developed at the magistral lectures will be assesed | 50 |
| keynote speech | B6 B7 B8 B9 C1 C2 | and considered for the final mark | |
| | C3 C4 C5 C6 C7 C8 | | |
| | C9 | | |
| Seminar | A15 B1 B2 B3 B4 B5 | The attendance to the semminars and the work being developed at the semminars will | 50 |
| | B6 B7 B8 B9 C1 C2 | be considered for the final mark | |
| | C3 C4 C5 C6 C7 C8 | | |
| | C9 | | |
