| General description     | "Introducción a los materiales com  | nplejos" es u                                       | na materia obligat   | oria de segundo cuatrim   | estre. Esta asignatura, de    |  |
|                         | carácter claramente interdisciplina   | r, pretende da                                      | ar una visión gene   | ral de los materiales con | nplejos y avanzados: metales, |  |
|                         | aleaciones, cerámicas, cristales líg  | quidos,MOFs,  | polímeros, nanom     | ateriales, etc.           |                               |  |
|                         | "Introduction to complex materials" is a compulsory subject of the Master 2nd four-month period. The aims of this |   |                      |                           |                               |  |
|                         | interdisciplinary subject is to provid  | le a general c                                      | verview of the diffe | erent types of complex a  | nd advanced materials: metals |  |
|                         | and alloys, ceramics, liquid crystals   | s, MOFs, pol  | ymers, nanomateri    | als, etc.                 |                               |  |

|      | Study programme competences   |
|------|---|
|      | 7. 0  |
| Code | Study programme competences   |
| A2   | Identify and evaluate the different types of complex materials  |
| A5   | Understanding the relationships between structure and properties of materials   |
| B2   | The students have the skill to apply their knowledge and their ability to solve problems in new or unfamiliar contexts within broader (or |
|      | multidisciplinary) contexts related to their field of study   |
| B4   | That the students can communicate their conclusions and the knowledge and last reasons behind that conclusions to specialized and non     |
|      | specialized audience in a clear and unambiguous way   |
| В8   | Applying a critical, logical and creative way of thinking   |
| B13  | Analysis-oriented attitude  |
| B14  | Ability to find and manage the information  |
| B17  | Analyze and decompose processes   |
| C2   | Have a good command of spoken and writing expression and understanding of a foreign language.   |
| C7   | To assume as a professional and citizen the importance of learning throughout life.   |
| C8   | To assess the importance of research, innovation and technological development in the socio-economic and cultural progress of society.    |

To help achieve a sustained immediate environment and

meet the objective of action number 5: "Healthy and sustainable

environmental and social teaching and research" of the "Green Campus

Ferrol Action Plan": The delivery

of the documentary work carried out in this subject: -

They will be requested in virtual format and/or computer support &

will be done through Moodle, in digital format without the need to print them. &

it is necessary to make them on paper:

- Plastics shall not be used

&n

- Recycled paper will be used.

- Printing of drafts shall be avoided. - A sustainable use of resources and the

prevention of negative impacts on the natural environment must be made.
