Cycle				Credits			
Official Master's Degr	ree 2nd four-month period	First		Optional	2		
Language	English						
Teaching method	Face-to-face						
Prerequisites							
Department	Enxeñaría Naval e Industrial						
Coordinador	Nicolas Costa, Gines	E-r	nail	gines.nicolas@ud	dc.es		
Lecturers	Nicolas Costa, Gines	E-r	nail	gines.nicolas@ud	dc.es		
Web		l		l			
General description	This course aims to describe the c	haracterization of materia	s by las	er analysis (especially	on plasma emission		
	spectroscopy induced by laser) and	d induced thermal effects					
Contingency plan	1. Modifications to the contents						
	- No changes are made						
	2. Methodologies	2. Methodologies					
	*Teaching methodologies that are	maintained					
	- Master Session						
	- Laboratory practices						
	- Supervised work (with personaliz	ed attention)					
	( ) ( )	,

	Study programme competences / results
Code	Study programme competences / results
A1	Set up and conduct tests using the techniques of thermal analysis and rheology most appropriate in each case, within the scope of
	complex materials
A5	Understanding the relationships between structure and properties of materials

B2	The students have the skill to apply their knowledge and their ability to solve problems in new or unfamiliar contexts within broader (or
	multidisciplinary) contexts related to their field of study
В3	That students are able to integrate knowledge and handle complexity, and formulate judgments from an information that, being limited or
	not complete, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and judgments
B4	That the students can communicate their conclusions and the knowledge and last reasons behind that conclusions to specialized and non
	specialized audience in a clear and unambiguous way
В8	Applying a critical, logical and creative way of thinking
B13	Analysis-oriented attitude
B21	To assess the importance of research, innovation and technological developments in the socio-economic and cultural progress of society
C2	Have a good command of spoken and writing expression and understanding of a foreign language.
C4	Developing for the exercise of an open, educated, critical, committed, democratic and solidary citicenship, able to analyze reality, diagnose
	problems, formulate and implement solutions based on knowledge and oriented to the common good.
C6	Critically assessing the knowledge, technology and information available to solve the problems they face with.
C7	To assume as a professional and citizen the importance of learning throughout life.
C8	To assess the importance of research, innovation and technological development in the socio-economic and cultural progress of society.

Learning outcomes			
Learning outcomes	Stud	y progra	amme
	COI	mpetenc	es/
		results	
Knowledge of the laser concepts and laser-interaction fundamentals	AR1	BR2	CR2
Knowledge of the processes about laser materials treatments		BR3	CR4
Knowledge of the processes about laser materials analyses		BR4	CR6
		BR8	CR7
		BR13	CR8
		BR21	

	Contents
Topic	Sub-topic
The following blocks or topics develop the contents	Laser irradiation of the material and subsequent thermal effects.
established in the Verification Report, which are:	Treatments by laser heating. Laser-based instrumental methods for analysis and
	characterization of materials.
1. Laser fundamentals	1.1 Basic laser mechanisms
	1.2 Optics and beam manipulation
	1.3 Types of lasers
2. Laser heat treatment	2.1 Interaction phenomena
	2.2 Basic regimes of the heating
	2.3 Types of heat treatments
3. Laser analysis	3.1 Fundamentals of laser spectroscopy
	3.2 Types of laser spectroscopy techniques
	3.3 Laser induced plasma spectroscopy

## **Assessment comments**

The evaluation criteria in the 2nd opportunity are the same as those in the 1st opportunity. Students with recognition of part-time dedication DO NOT have an academic exemption of attendance exemption for Laboratory Practices, although they will be given facilities regarding the dates of completion prior communication. The criteria and evaluation activities for this student will be the same as for the rest of the students.

Recommendations
Subjects that it is recommended to have taken before
Subjects that are recommended to be taken simultaneously
Subjects that continue the syllabus
Other comments

To help achieve a sustained immediate environment and meet the goal of action number 5: "Healthy and environmental and social teaching and research" of the "Green Campus Ferrol Action Plan", the following recommendations are made: - Make a sustainable use of resources and the prevention of negative impacts on the natural environment.- The delivery of the documentary works that are made in this matter: it will be done through Moodle, in digital format without the need to print them. If it is necessary to make them on paper.- Plastics will not be used.- Double-sided prints will be made.- Recycled paper will be used. - The printing of drafts will be avoided.
