General description	This course is an introduction to the science of polymers and provides an overview of characterization, structure and properties of polymers. It is illustrated by examples of applications of polymers.			

Study programme competences

Code	Study programme competences
A5	Understanding the relationships between structure and properties of materials
B1	Knowledge and understanding to provide a basis or opportunity for originality in developing and / or applying ideas, often in a research context
B2	The students have the skill to apply their knowledge and their ability to solve problems in new or unfamiliar contexts within broader (or multidisciplinary) contexts related to their field of study
B4	That the students can communicate their conclusions and the knowledge and last reasons behind that conclusions to specialized and non specialized audience in a clear and unambiguous way
B8	Applying a critical, logical and creative way of thinking
B12	Communicate effectively in the work environment
B13	Analysis-oriented attitude
B14	Ability to find and manage the information
B18	Ability for abstraction, understanding and simplification of complex problems
B21	To assess the importance of research, innovation and technological developments in the socio-economic and cultural progress of society
C2	Have a good command of spoken and writing expression and understanding of a foreign language.
C4	Developing for the exercise of an open, educated, critical, committed, democratic and solidary citizenship, able to analyze reality, diagnose problems, formulate and implement solutions based on knowledge and oriented to the common good.
C6	Critically assessing the knowledge, technology and information available to solve the problems they face with.
C8	To assess the importance of research, innovation and technological development in the socio-economic and cultural progress of society.

Learning outcomes

Learning outcomes	Study programme competences
-------------------	-----------------------------

This course is designed as an introduction to the basic science of polymers and provides an overview of characterization, structure and properties of polymers. The course offers an introduction to the science underlying the synthesis and characterization of polymer morphology polymers, and information about their structures and properties. The course also illustrates some examples of applications of polymers.

AR5	BR1	CR2
	BR2	CR4
	BR4	CR6
	BR8	CR8
	BR12	
	BR13	
	BR14	
	BR18	
	BR21	

Contents	
Topic	Sub-topic
1. Physicochemical fundamentals of polymers	
2. Synthesis and characterization of polymers (polymer synthesis: stepwise polymerization and PCR Structure: chain conformations, amorphous polymers and semicrystalline polymers morphology, molecular weight measurement)	
3. Introduction to polymer processing	
4. mechanical and rheological properties (behavioral stress / strain, viscoelasticity, nonlinear mechanical behavior and rheological).	

Planning				
Methodologies / tests	Competencies	Ordinary class hours	Student?s personal work hours	Total hours
Guest lecture / keynote speech	A5 B1 B2 B12 B13 B18	15	10	25
Laboratory practice	B8 B14 B21 C4 C6 C8	15	5	20
Supervised projects	B2 B4 B14 B21 C2	5	25	30
Personalized attention		0		0
(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.				

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Presentation given by the professor, on a schematic basis, focusing on the main topics, covering both theoretical and practical issues.
Laboratory practice	Performance of practical activities such as demonstrations, exercises, experiments, etc..
Supervised projects	Activities whose purpose is that the students enlarge the study of the topics presented in the program and consolidate their acquired knowledge and capabilities. These activities should also help the students learn and improve their capabilities in literature survey.

Personalized attention	
Methodologies	Description
Guest lecture / keynote speech	The personalized attention to students, understood as a support in the teaching-learning process, will take place in the hours of tutoring of the professor.
Laboratory practice	
Supervised projects	

Assessment

Methodologies	Competencies	Description	Qualification
Guest lecture / keynote speech	A5 B1 B2 B12 B13 B18	Examination or objective test.	50
Laboratory practice	B8 B14 B21 C4 C6 C8	Continuous assessment through monitoring of student work in the classroom, laboratory and / or tutorials.	20
Supervised projects	B2 B4 B14 B21 C2	Presentation (oral and written) of the supervised work.	30
