General description	This course is an introduction to th	e science of polymers and p	rovides an overview of ch	aracterization, structure and	
	properties of polymers. It is illustrated by examples of applications of polymers.				

	Study programme competences			
Code	ode Study programme competences			
A5	Understanding the relationships between structure and properties of materials			
B1	Knowledge and understanding to provide a basis or opportunity for originality in developing and / or applying ideas, often in a research context			
B2	The students have the skill to apply their knowledge and their ability to solve problems in new or unfamiliar contexts within broader (or			
	multidisciplinary) contexts related to their field of study			
B4	That the students can communicate their conclusions and the knowledge and last reasons behind that conclusions to specialized and non			
	specialized audience in a clear and unambiguous way			
B8	Applying a critical, logical and creative way of thinking			
B12	312 Communicate effectively in the work environment			
B13	Analysis-oriented attitude			
B14	Ability to find and manage the information			
B18	Ability for abstraction, understanding and simplification of complex problems			
B21	To assess the importance of research, innovation and technological developments in the socio-economic and cultural progress of society			
C2	Have a good command of spoken and writing expression and understanding of a foreign language.			
C4	Developing for the exercise of an open, educated, critical, committed, democratic and solidary citicenship, able to analyze reality, diagnose			
	problems, formulate and implement solutions based on knowledge and oriented to the common good.			
C6	Critically assessing the knowledge, technology and information available to solve the problems they face with.			
C8	To assess the importance of research, innovation and technological development in the socio-economic and cultural progress of society.			

Learning outcomes			
Learning outcomes	Study programme		
	competences		

This course is designed as an introduction to the basic science of polymers and provides an overview of characterization,	AR5	BR1	CR2
structure and properties of polymers. The course offers an introduction to the science underlying the synthesis and		BR2	CR4
characterization of polymer morphology polymers, and information about their structures and properties. The course also		BR4	CR6
illustrates some examples of applications of polymers.		BR8	CR8
		BR12	
		BR13	
		BR14	
		BR18	
		BR21	

Contents			
Торіс	Sub-topic		
1. Physicochemical fundamentals of polymers			
2. Synthesis and characterization of polymers (polymer			
synthesis: stepwise polymerization and PCR Structure: chain			
conformations, amorphous polymers and semicrystalline			
polymers morphology, molecular weight measurement)			
3. Introduction to polymer processing			
4. mechanical and rheological properties (behavioral stress /			
strain, viscoelasticity, nonlinear mechanical behavior and			
rheological).

	Methodologies			
Methodologies Description				
Guest lecture /	Guest lecture / Presentation given by the professor, on a schematic basis, focusing on the main topics, covering both theoretical and practical			
keynote speech	keynote speech issues.			
Laboratory practice	Laboratory practice Performance of practical activities such as demonstrations, exercises, experiments, etc			
Supervised projects	Activities whose purpose is that the students enlarge the study of the topics pesented in the program and consolidate their			
	acquired knowledge and capabilities. These activities should also help the students learn and improve their capabilities in			
	literature survey.			

Personalized attention			
Methodologies Description			
Guest lecture /	Guest lecture / The personalized attention to students, understood as a support in the teaching-learning process, will take place in the hours		
keynote speech	of tutoring of the professor.		
Laboratory practice			
Supervised projects	No academic dispensation is accepted.		

Assessment			
Methodologies Competencies		Description	Qualification
Guest lecture /	A5 B1 B2 B12 B13	Examination or objective test.	50
keynote speech	B18		
Laboratory practice	B8 B14 B21 C4 C6	Continuous assessment through monitoring of student work in the classroom,	20
	C8	laboratory and / or tutorials.	
Supervised projects	B2 B4 B14 B21 C2	Presentation (oral and written) of the supervised work.	30
