| <b>General description</b> | The course provides a thorough treatment of the continuum mechanics for liquids and solids. It is to present the different mechanical behavior of matter in the continuum limit by applying Newton's laws of motion to the solid materials (elasticity) and fluid behavior. |               |                                   |         |         |

## Study programme competences

| Code | Study programme competences   |
|------|---|
| A5   | Understanding the relationships between structure and properties of materials   |
| A7   | Knowing the different types of thermal thermo-mechanical behaviors in materials subjected to fatigue  |
| B1   | Knowledge and understanding to provide a basis or opportunity for originality in developing and / or applying ideas, often in a research context  |
| B2   | The students have the skill to apply their knowledge and their ability to solve problems in new or unfamiliar contexts within broader (or multidisciplinary) contexts related to their field of study |
| B4   | That the students can communicate their conclusions and the knowledge and last reasons behind that conclusions to specialized and non specialized audience in a clear and unambiguous way             |
| B8   | Applying a critical, logical and creative way of thinking   |
| B9   | To work autonomously with initiative  |
| B13  | Analysis-oriented attitude  |
| B14  | Ability to find and manage the information  |
| B21  | To assess the importance of research, innovation and technological developments in the socio-economic and cultural progress of society  |
| C2   | Have a good command of spoken and writing expression and understanding of a foreign language.   |
| C6   | Critically assessing the knowledge, technology and information available to solve the problems they face with.  |
| C7   | To assume as a professional and citizen the importance of learning throughout life.   |
| C8   | To assess the importance of research, innovation and technological development in the socio-economic and cultural progress of society.  |

## Learning outcomes

| Learning outcomes  | Study programme competences |      |     |
|--|-----------------------------|------|-----|
| The course provides a thorough treatment of the mechanics of continuous media for fluids and solids. The aim is to present the different mechanical behavior of matter in the continuous limit. Newton's laws of motion in media with strong performance (elasticity) and / or fluid is applied. | AR5                         | BR1  | CR2 |
|  | AR7                         | BR2  | CR6 |
|  |                             | BR4  | CR7 |
|  |                             | BR8  | CR8 |
|  |                             | BR9  |     |
|  |                             | BR13 |     |
|  |                             | BR14 |     |
|  |                             | BR21 |     |

| Contents  |           |
|---|-----------|
| Topic   | Sub-topic |
| 1. Introduction to elastic modulus (Young's modulus, shear modulus, bulk modulus, ...) of a solid and a fluid viscosities |           |
| 2. Description of the displacement field in an elastic body, and velocity field in a fluid                                |           |
| 3. Expression of elastic energy in linear elasticity, and the rate of viscous fluid in dedisipación                       |           |
| 4. Description of the different apparatus for measuring or viscous elastic properties (or both) of a medium.              |           |

| Planning                       |                           |                      |                               |             |
|--------------------------------|---------------------------|----------------------|-------------------------------|-------------|
| Methodologies / tests          | Competencies              | Ordinary class hours | Student?s personal work hours | Total hours |
| Guest lecture / keynote speech | A5 A7 B1 B9 B14 B21       | 10                   | 18                            | 28          |
| Laboratory practice            | B2 B4 B8 B13 C8           | 20                   | 20                            | 40          |
| Supervised projects            | B9 B13 B14 C2 C6<br>C7 C8 | 5                    | 25                            | 30          |
| Personalized attention         |                           | 2                    | 0                             | 2           |

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

| Methodologies                  |   |
|--------------------------------|---|
| Methodologies                  | Description   |
| Guest lecture / keynote speech | Presentation given by the professor, on a schematic basis, focusing on the main topics, covering both theoretical and practical issues.   |
| Laboratory practice            | Performance of practical activities such as demonstrations, exercises, experiments, etc..   |
| Supervised projects            | Activities whose purpose is that the students enlarge the study of the topics presented in the program and consolidate their acquired knowledge and capabilities. These activities should also help the students learn and improve their capabilities in literature survey. |

| Personalized attention         |  |
|--------------------------------|--|
| Methodologies                  | Description  |
| Guest lecture / keynote speech | The personalized attention to students, understood as a support in the teaching-learning process, will take place in the hours of tutoring of the professor. |

| Assessment                     |                           |   |               |
|--------------------------------|---------------------------|---|---------------|
| Methodologies                  | Competencies              | Description   | Qualification |
| Guest lecture / keynote speech | A5 A7 B1 B9 B14 B21       | Examination or objective test.  | 50            |
| Laboratory practice            | B2 B4 B8 B13 C8           | Continuous assessment through monitoring of student work in the classroom, laboratory and / or tutorials. | 20            |
| Supervised projects            | B9 B13 B14 C2 C6<br>C7 C8 | Presentation (oral and written) of the supervised work.   | 30            |
