General description	The course provides a thorough treatment of the continuum mechanics for liquids and solids. It is to present the different mechanical behavior of matter in the continuum limit by applying Newton's laws of motion to the solid materials (elasticity) and fluid behavior.			

Study programme competences

Code	Study programme competences
A5	Understanding the relationships between structure and properties of materials
A7	Knowing the different types of thermal thermo-mechanical behaviors in materials subjected to fatigue
B1	Knowledge and understanding to provide a basis or opportunity for originality in developing and / or applying ideas, often in a research context
B2	The students have the skill to apply their knowledge and their ability to solve problems in new or unfamiliar contexts within broader (or multidisciplinary) contexts related to their field of study
B4	That the students can communicate their conclusions and the knowledge and last reasons behind that conclusions to specialized and non specialized audience in a clear and unambiguous way
B8	Applying a critical, logical and creative way of thinking
B9	To work autonomously with initiative
B13	Analysis-oriented attitude
B14	Ability to find and manage the information
B21	To assess the importance of research, innovation and technological developments in the socio-economic and cultural progress of society
C2	Have a good command of spoken and writing expression and understanding of a foreign language.
C6	Critically assessing the knowledge, technology and information available to solve the problems they face with.
C7	To assume as a professional and citizen the importance of learning throughout life.
C8	To assess the importance of research, innovation and technological development in the socio-economic and cultural progress of society.

Learning outcomes

Learning outcomes	Study programme competences		
The course provides a thorough treatment of the mechanics of continuous media for fluids and solids. The aim is to present the different mechanical behavior of matter in the continuous limit. Newton's laws of motion in media with strong performance (elasticity) and / or fluid is applied.	AR5	BR1	CR2
	AR7	BR2	CR6
		BR4	CR7
		BR8	CR8
		BR9	
		BR13	
		BR14	
		BR21	

Contents	
Topic	Sub-topic
1. Introduction to elastic modulus (Young's modulus, shear modulus, bulk modulus, ...) of a solid and a fluid viscosities	
2. Description of the displacement field in an elastic body, and velocity field in a fluid	
3. Expression of elastic energy in linear elasticity, and the rate of viscous fluid in dedispación	
4. Description of the different apparatus for measuring or viscous elastic properties (or both) of a medium.	

Planning				
Methodologies / tests	Competencies	Ordinary class hours	Student's personal work hours	Total hours
Guest lecture / keynote speech	A5 A7 B1 B9 B14 B21	10	18	28
Laboratory practice	B2 B4 B8 B13 C8	20	20	40
Supervised projects	B9 B13 B14 C2 C6 C7 C8	5	25	30
Personalized attention		2	0	2
(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.				

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Presentation given by the professor, on a schematic basis, focusing on the main topics, covering both theoretical and practical issues.
Laboratory practice	Performance of practical activities such as demonstrations, exercises, experiments, etc..
Supervised projects	Activities whose purpose is that the students enlarge the study of the topics presented in the program and consolidate their acquired knowledge and capabilities. These activities should also help the students learn and improve their capabilities in literature survey.

Personalized attention	
Methodologies	Description
Guest lecture / keynote speech	The personalized attention to students, understood as a support in the teaching-learning process, will take place in the hours of tutoring of the professor. No academic dispensation is accepted.

Assessment			
Methodologies	Competencies	Description	Qualification
Guest lecture / keynote speech	A5 A7 B1 B9 B14 B21	Examination or objective test.	50
Laboratory practice	B2 B4 B8 B13 C8	Continuous assessment through monitoring of student work in the classroom, laboratory and / or tutorials.	20
Supervised projects	B9 B13 B14 C2 C6 C7 C8	Presentation (oral and written) of the supervised work.	30

Other comments

To help achieve a sustained immediate environment and meet the objective of action number 5: "Healthy and sustainable environmental and social teaching and research" of the "Green Campus Ferrol Action Plan: The delivery of the documentary work carried out in this subject: - They will be requested in virtual format and/or computer support - It will be done through Moodle, in digital format without the need to print them. - If it is necessary to make them on paper: - Double-sided printing shall be carried out. - Recycled paper will be used. - Printing of drafts shall be avoided. - A sustainable use of resources and the prevention of negative impacts on the natural environment must be made. - It will work to identify and change gender biases and attitudes, and influence the environment to change them and promote values of respect and equality. - Situations of discrimination should be identified and actions and measures proposed to correct them.
