Teaching Guide				
Identifying Data				2020/21
Subject (*)	Acoustic Waves		Code	730495015
Study programme	Mestrado Universitario en Materiais Complexos: Análise Térmica e Reoloxía (plan 2012)			
Descriptors				
Cycle	Period	Year	Type	Credits
Official Master's Degree	1st four-month period	First	Optional	4
Language	English			
Teaching method	Face-to-face			
Prerequisites				
Department				
Coordinador	Derode , Arnoud	E-mail	arnoud.derode@espci.fr	
Lecturers	Derode , Arnoud	E-mail	arnoud.derode@espci.fr	
Web				
General description	By focusing on the core concepts of propagation of sound waves, this course provides students with the skills necessary to study the acoustical problems in complex fluids.			
Contingency plan	<div>1. Modifications to the contents</div> <div>The contents are not modified</div> <div>2. Methodologies</div> <div>*Teaching methodologies that are maintained</div> <div>Guest lecture/keynote speech (via Teams)</div> <div>Supervised projects (tutored via Teams or email)</div> <div>*Teaching methodologies that are modified</div> <div>Laboratory practice. It is replaced by the presentation of practical cases in the Keynote sessions and the reading and discussion of scientific articles (analysis of documentary sources).</div> <div>3. Mechanisms for personalized attention to students</div> <div>- Email: Daily. Used to make queries, request virtual meetings to resolve doubts and monitor the work being supervised.</div> <div>- Microsoft Teams: Personalized tutoring of students</div> <div>- Moodle: This will be used as a repository for documentation provided to students.</div> <div>4. Modifications in the evaluation</div> <div>Keynote Sessions 60%</div> <div>Supervised projects 30%</div> <div>Analysis of documentary sources 10%</div> <div>*Evaluation observations: -</div> <div>5. Modifications to the bibliography or webgraphy</div> <div>No change.</div>			

Study programme competences

Code	Study programme competences
A4	Knowing and applying statistical methods to analyze data from complex material testing
A5	Understanding the relationships between structure and properties of materials
B1	Knowledge and understanding to provide a basis or opportunity for originality in developing and / or applying ideas, often in a research context

B2	The students have the skill to apply their knowledge and their ability to solve problems in new or unfamiliar contexts within broader (or multidisciplinary) contexts related to their field of study
B4	That the students can communicate their conclusions and the knowledge and last reasons behind that conclusions to specialized and non specialized audience in a clear and unambiguous way
B8	Applying a critical, logical and creative way of thinking
B12	Communicate effectively in the work environment
B18	Ability for abstraction, understanding and simplification of complex problems
B19	Will of continuous improvement
B21	To assess the importance of research, innovation and technological developments in the socio-economic and cultural progress of society
C2	Have a good command of spoken and writing expression and understanding of a foreign language.
C6	Critically assessing the knowledge, technology and information available to solve the problems they face with.
C7	To assume as a professional and citizen the importance of learning throughout life.
C8	To assess the importance of research, innovation and technological development in the socio-economic and cultural progress of society.

Learning outcomes			
Learning outcomes		Study programme competences	
		AR4	BR1 CR2
		AR5	BR2 CR6
			BR4 CR7
			BR8 CR8
			BR12
			BR18
			BR19
		BR21	

Contents	
Topic	Sub-topic
Acoustic waves in perfect and viscous fluids	
Phenomena at the interface.	
Introduction to non-linear effects, shock waves	
Diffraction theory (harmonic regime and impulses)	
Elastic waves in soft solids	

Planning				
Methodologies / tests	Competencies	Ordinary class hours	Student's personal work hours	Total hours
Guest lecture / keynote speech	A4 A5 B1 B4 B18 C2	10	18	28
Laboratory practice	B2 B8 B12 B19 B21 C8	20	20	40
Supervised projects	B4 B19 B21 C2 C6 C7	5	25	30
Personalized attention		2	0	2

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Presentation given by the professor, on a schematic basis, focusing on the main topics, covering both theoretical and practical issues.
Laboratory practice	Performance of practical activities such as demonstrations, exercises, experiments, etc..

Supervised projects	Activities whose purpose is that the students enlarge the study of the topics presented in the program and consolidate their acquired knowledge and capabilities. These activities should also help the students learn and improve their capabilities in literature survey.
---------------------	---

Personalized attention	
Methodologies	Description
Guest lecture / keynote speech	<p>The personalized attention to students, understood as a support in the teaching-learning process, will take place in the hours of tutoring of the professor.</p> <p>No academic dispensation is accepted.</p>

Assessment			
Methodologies	Competencies	Description	Qualification
Guest lecture / keynote speech	A4 A5 B1 B4 B18 C2	Examination or objective test.	50
Laboratory practice	B2 B8 B12 B19 B21 C8	Continuous assessment through monitoring of student work in the classroom, laboratory and / or tutorials.	20
Supervised projects	B4 B19 B21 C2 C6 C7	Presentation (oral and written) of the supervised work.	30

Assessment comments

Subjects that are recommended to be taken simultaneously
Subjects that continue the syllabus
Other comments
<p>To help achieve a sustained immediate environment and meet the objective of action number 5: "Healthy and sustainable environmental and social teaching and research" of the "Green Campus Ferrol Action Plan: The delivery of the documentary work carried out in this subject: They will be requested in virtual format and/or computer support. It will be done through Moodle, in digital format without the need to print them. If it is necessary to make them on paper: Plastics shall not be used. Double-sided printing shall be carried out. Recycled paper will be used. Printing of drafts shall be avoided. A sustainable use of resources and the prevention of negative impacts on the natural environment must be made. It will work to identify and change gender biases and attitudes, and influence the environment to change them and promote values of respect and equality. Situations of discrimination should be identified and actions and measures proposed to correct them.</p>
