

Teaching Guide					
	Identifying Data 2023/24				2023/24
Subject (*)	Logistic Systems Simulation Code 730497233		730497233		
Study programme	Study programme Mestrado Universitario en Enxeñaría Industrial (plan 2018)				
		Descript	tors		
Cycle	Cycle Period Year Type Credits				Credits
Official Master's Degree	e 1st four-month period	Secon	ld	Optional	4.5
Language	Language Spanish				
Teaching method	d Face-to-face				
Prerequisites					
Department	Department Empresa				
Coordinador	Crespo Pereira, Diego E-mail diego.crespo@udc.es				
Lecturers	Crespo Pereira, Diego E-mail diego.crespo@udc.es				
Web http://www.gii.udc.es/					
General description Simulation is a Lean technique to design and improve processes that plays a key role in Industry 4.0. The purpose of this					
subject is to learn discrete events simulation applied to problem solving in logistics. Specifically, the students will have to					
solve design and optimization problems about internal logistics such as material handling, warehouses and storage, etc.			warehouses and storage, etc.		

	Study programme competences
Code	Study programme competences
A13	EG5 - Knowledge of management information systems, industrial organization, production systems and logistics and quality management
	systems.
A14	EG6 - Capacities for work organization and human resources management. Knowledge on prevention of occupational risks.
B2	CB7 - That students know how to apply the knowledge acquired and their ability to solve problems in new or unfamiliar environments
	within broader (or multidisciplinary) contexts related to their area of ??study.
B3	CB8 - That students are able to integrate knowledge and face the complexity of making judgments based on information that, being
	incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and
	judgments.
B4	CB9 - That the students know how to communicate their conclusions -and the knowledge and ultimate reasons that sustain them- to
	specialized and non-specialized audiences in a clear and unambiguous way.
B6	G1 - Have adequate knowledge of the scientific and technological aspects in Industrial Engineering.
B7	G2 - Project, calculate and design products, processes, facilities and plants.
B13	G8 - Apply the knowledge acquired and solve problems in new or unfamiliar environments within broader and multidisciplinary contexts.
B14	G9 - Be able to integrate knowledge and face the complexity of making judgments based on information that, being incomplete or limited,
	includes reflections on social and ethical responsibilities linked to the application of their knowledge and judgments.
B15	G10 - Knowing how to communicate the conclusions -and the knowledge and ultimate reasons that sustain them- to specialized and
	non-specialized publics in a clear and unambiguous way.
C1	ABET (a) - An ability to apply knowledge of mathematics, science, and engineering.
C3	ABET (c) - An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic,
	environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
C5	ABET (e) - An ability to identify, formulate, and solve engineering problems.
C6	ABET (f) - An understanding of professional and ethical responsibility.
C7	ABET (g) - An ability to communicate effectively.
C8	ABET (h) - The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and
	societal context.
C9	ABET (i) - A recognition of the need for, and an ability to engage in life-long learning.
C11	ABET (k) - An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Assessment comments

O "Alumnado con recoñecemento de dedicación a tempo parcial e dispensa académica de exención de asistencia" comunicarán ó inicio do curso a súa situación os profesores da materia, segundo establece a "Norma que regula o réxime de dedicación ao estudo dos estudantes de grao na UDC" (Art.3.b e 4.5) e as ?Normas de avaliación, revisión e reclamación das cualificacións dos estudos de grao e mestrado universitario (Art. 3 e 8b). Para os alumnos que soliciten a dispensa académica a avaliación será igual ao resto xa que os traballos tutelados serán completados fora do horario de clases.

Para os alumnos tanto de primeira como de segunda oportunidade, a avaliación realizarase dando o peso relativo indicado na táboa de metodoloxías, o mesmo que para os alumnos de convocatoria adiantada.

A realización fraudulenta das probas ou

actividades de avaliación implicará directamente a cualificación de suspenso

'0' na materia na correspondente convocatoria, invalidando así calquera

cualificación obtida en todas as actividades de avaliación.

Other comments
A sustainable use of resources must be made to prevent the negative impact on the natural environment. For this reason, the delivery of the
documentary works carried out in this subject: & nbsp;? They will be requested in virtual format and / or computer support & nbsp;? It will be done
through Moodle, in digital format without needing to print them ? If it is necessary to make them on paper: a) plastics will not be used, b)
double-sided impressions will be made, c) recycled paper will be used, d) the printing of drafts will be avoided.
