| General description      | The overall aim of the course is to provide an understanding of the engineering and mathematical analyses that form the basics of monitoring and decision support systems used for onboard/navigational guidance of ships. These techniques are used by naval architects and engineers in the technical departments of ship owners, in classification societies and ship consultancies. Moreover, the student will be trained in advanced methods to evaluate ship operations with regards to the increased focus on energy consumption and emissions from ship. |        |                                                       |           |

## Study programme competences

| Code | Study programme competences                                                                                                                                                                                                                                                         |
|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| A6   | CE6 - Demonstrate knowledge, understanding and competences in fulfilling safety, economic and sustainability requirements in ship operation and management (SO).                                                                                                                    |
| B2   | CB6 - Acquire and understand knowledge that provides a basis or opportunity to be original in the development and / or application of ideas, usually in a research context.                                                                                                         |
| B3   | CB7 - That students know how to apply the acquired knowledge and their ability to solve problems in new or unfamiliar environments within broader (or multidisciplinary) contexts related to their area of study.                                                                   |
| B4   | CB8 - That students are able to integrate knowledge and face the complexity of making judgments based on information that, being incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and judgments. |
| B5   | CB9 ? That students are able to communicate their conclusions -and the knowledge and ultimate reasons that sustain them- to specialized and non-specialized publics in a clear and unambiguous way.                                                                                 |
| B6   | CB10 - That students have the learning skills that allow them to continue studying in a way that will be largely self-directed or autonomous.                                                                                                                                       |
| B7   | CG1 ? To display the adequate intercultural competence to successfully navigating within multicultural learning environments and to implement basic management principles suitable for a multicultural working environment.                                                         |
| B8   | CG2 ? To express an attitude of intellectual inquisitiveness and open-mindedness.                                                                                                                                                                                                   |
| B11  | CG5 ? To have the capability to identify, formulate and solve engineering problems within realistic constraints.                                                                                                                                                                    |
| B12  | CG6 ? To appreciate the impact of sustainable development goals in maritime transport.                                                                                                                                                                                              |
| B13  | CG7 ? To have the capability to critically analyse, synthesise, interpret and summarise complex scientific processes.                                                                                                                                                               |
| C2   | CT2 - Mastering oral and written expression in a foreign language.                                                                                                                                                                                                                  |
| C3   | CT3 - Using ICT in working contexts and lifelong learning.                                                                                                                                                                                                                          |
| C4   | CT4 - Acting as a respectful citizen according to democratic cultures and human rights and with a gender perspective.                                                                                                                                                               |
| C6   | CT6 - Acquiring skills for healthy lifestyles, and healthy habits and routines.                                                                                                                                                                                                     |
| C7   | CT7 -Developing the ability to work in interdisciplinary or transdisciplinary teams in order to offer proposals that can contribute to a sustainable environmental, economic, political and social development.                                                                     |

## Learning outcomes

| Learning outcomes                                                                                                                                                                                                             | Study programme competences |                                                                       |                                 |

| Guest lecture / keynote speech | <p>Oral presentation (using audiovisual material and student interaction) designed to transmit knowledge and encourage learning. Presentations of this type are variously referred to as 'expository method?', 'guest lectures?' or 'keynote speeches?.'</p> <p>In this course, these presentations will be made by different professors, both from the UDC and from DTU.</p> |

|                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|---------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Mixed objective/subjective test | Mixed test consisting of essay-type and objective test questions. Essay section consists of open (extended answer) questions; objective test may contain multiple-choice, ordering and sequencing, short answer, binary, completion and/or multiple-matching questions.                                                                                                                                                                                                                                                                                                                                      |
| Supervised projects             | <p>Supervised learning process aimed at helping students to work independently in a range of contexts (academic and professional). Focused primarily on learning ?how to do things? and on encouraging students to become responsible for their own learning.</p> <p>In this course, the supervised project will consist on a group based technical report based on an assignment done by the professors, and dealing about some of the topics of the course. This report may be presented in front of the rest of students. This fact will be announced in Moodle/Teams at the beginning of the course.</p> |
| Oral presentation               | <p>Core component of teaching-learning process involving coordinated oral interaction between student and teacher, including proposition, explanation and dynamic exposition of facts, topics, tasks, ideas and principles.</p> <p>In this course, the oral presentation will consist on the presentation of the technical report in front of the rest of students and the professors.</p>                                                                                                                                                                                                                   |
| ICT practicals                  | <p>Practice-based learning method for theoretical subject content using ICT resources (demonstrations, simulations, etc.) ICT is an excellent medium for practical knowledge applications and information processing, and a key aid to student learning and skills development.</p> <p>In this course, MATLAB will be used to implement some of the systems described during the theoretical lectures.</p>                                                                                                                                                                                                   |

## Personalized attention

| Methodologies                         | Description                                                                                                                                                                                                       |
|---------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Guest lecture / keynote speech        | The professors will provide personalized attention to the students both personally and remotely using MS Teams or email.                                                                                          |
| Supervised projects<br>ICT practicals | In this course, this personalized attention will consist on support while developing the supervised projects, the ICT practicals and doubts and questions related to the contents elaborated during the lectures. |

## Assessment

| Methodologies                   | Competencies                                      | Description                                                                                                                                                                                                                                      | Qualification |
|---------------------------------|---------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Supervised projects             | A6 B2 B3 B4 B5 B6<br>B7 B8 B11 B13 C2<br>C3 C4 C7 | <p>The qualification of the group based technical report will represent a 40 % of the student's final qualification.</p> <p>In case the oral presentation is not finally programmed, the percentage of the supervised projects will be 50 %.</p> | 40            |
| Mixed objective/subjective test | A6 B2 B3 B4 B6 B11<br>B13 C2                      | The qualification of the theoretical exam of this course will represent a 50 % of the student's final qualification.                                                                                                                             | 50            |
| Oral presentation               | B5 B13 C2 C3 C7                                   | In case the oral presentation is finally programmed, the percentage of its qualification will be a 10 %, including the presentation and the answers to the questions formulated by the professors and other students.                            | 10            |

## Assessment comments

According to the degree regulations, the students will have the opportunity to pass this course in two opportunities (first and second opportunity). In order to pass the course, an overall mark of 5 out of 10 should be obtained by applying the percentages above to each of the methodologies, considering each of them evaluated in a scale from 0 to 10. At the beginning of the course, dates for presenting the technical reports and doing the oral presentation will be published in Moodle/ MS Teams. In the second opportunity, students will be able to repeat the exam and correct/modify the technical reports; however, in order to pass the course, both the technical report and the oral presentation should have been done in any case fulfilling the prescribed deadlines set during the course. General EMJMD Sustainable Ship and Shipping SEAS 4.0 evaluation rules:- Students will have only two opportunities to pass a course. If failing to do so, they may be forced to leave the degree.- No part time or lecture attendance exemption are allowed in this degree.

## Recommendations

### Subjects that it is recommended to have taken before

2ND Generation Stability Criteria/730542006

Ship Seakeeping/730542008

### Subjects that are recommended to be taken simultaneously

Manoeuvrability and Shallow Water Ship Hydrodynamics/730542012

### Subjects that continue the syllabus

## Other comments

To help in achieving a sustainable environment and to get the objective of number 5 action of the "Ferrol Green Campus Action Plan" (Healthy and environmentally and socially sustainable research and teaching): The assignments to be done in this course:- Will be required in digital format.- Will be delivered using Moodle, with no need to print them. In case it is necessary to print them:- Plastics won't be used.- Two side printing will be used.- Recycled paper will be used.- Printing drafts will be avoided. A sustainable use of the resources should be done, together with the prevention of negative impacts on the environment.&nbsp;
