Descripción general	The objective of this course is to p	provide the students th	e insights of ho	w ships are used	to earn money. In order to do so,
	the functioning of the maritime ma	rkets needs to be und	erstood. Also, it	is the aim to exp	lain that ships are part of a larger
	logistics chain and that the interact	tion in the port and wit	h the other tran	sport modes is vi	tal. Next to that, also the working
	principals of a port are explained e	even as hinterland trar	sport. Finally, t	he current develo	pments regarding emission
	reductions in the total transport ch	ain are dealt with.			

	Competencias del título
Código	Competencias del título
A6	CE6 - Demonstrate knowledge, understanding and competences in fulfilling safety, economic and sustainability requirements in ship
	operation and management (SO).
B2	CB6 - Acquire and understand knowledge that provides a basis or opportunity to be original in the development and / or application of
	ideas, usually in a research context.
B3	CB7 - That students know how to apply the acquired knowledge and their ability to solve problems in new or unfamiliar environments
	within broader (or multidisciplinary) contexts related to their area of study.
B4	CB8 - That students are able to integrate knowledge and face the complexity of making judgments based on information that, being
	incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and
	judgments.
B5	CB9 ? That students are able to communicate their conclusions -and the knowledge and ultimate reasons that sustain them- to specialize
	and non-specialized publics in a clear and unambiguous way.
B6	CB10 - That students have the learning skills that allow them to continue studying in a way that will be largely self-directed or autonomous
B7	CG1 ? To display the adequate intercultural competence to successfully navigating within multicultural learning environments and to
	implement basic management principles suitable for a multicultural working environment.
B8	CG2 ? To express an attitude of intellectual inquisitiveness and open-mindedness.
B12	CG6 ? To appreciate the impact of sustainable development goals in maritime transport.
C2	CT2 - Mastering oral and written expression in a foreign language.
C4	CT4 - Acting as a respectful citizen according to democratic cultures and human rights and with a gender perspective.
C5	CT5 - Understanding the importance of entrepreneurial culture and the useful means for enterprising people.
C6	CT6 - Acquiring skills for healthy lifestyles, and healthy habits and routines.
C7	CT7 -Developing the ability to work in interdisciplinary or transdisciplinary teams in order to offer proposals that can contribute to a
	sustainable environmental, economic, political and social development.
C8	CT8 -Valuing the importance of research, innovation and technological development for the socioeconomic and cultural progress of
	society.

	título

Capability to understand how the maritime sector is structured, how it is part of a more complex logistic system and how ships	AM6	BM1	CM2
and ports are integrated within it.		BM2	CM4
		BM3	CM5
		BM4	CM6
		BM5	CM7
		BM6	CM8
		BM7	
		BM11	

Contenidos		
Tema	Subtema	
Lesson 1	Main introduction lesson where the global maritime transport chain is explained. This	
	chain will include, maritime part of the transport, ports and the hinterland transport.	
	The main objective here is to show that a ship is part of a bigger transport chain. A	
	model (which has been developed by me) can also be offered to the students to make	
	some calculations. This could be part of the paper/ assignment.	
Lesson 2	Maritime lecture part 1: Economic organization of the shipping market. This will be a	
	based on Stopford (2006)	
Lesson 3	Maritime lecture part 2: Sub-markets & amp; cash flow in shipping. Also this lecture will	
	be based on Stopford (2006)	
Lesson 4	Port lecture part 1: The organization of ports. What are ports, how do they function	
Lesson 5	Port lecture part 2: The organization of ports. What are ports, how do they function,	
	and what is the interaction with ships (bunkerings and provision of alternative fuels).	
Lesson 6	Hinterland lecture part 1: Port hinterland transport. In this lecture is explained how	
	cargo being shipped from ports to the hinterland and which transport modes can be	
	used (road, rail, IWT).	
Lesson 7	Hinterland lecture part 2: Modal choice, intermodal transport and hinterland	
	infrastructure.	
Lesson 8	Emission mitigation in maritime transport chains and the impact it has on both	
	shippers and vessel owners.	
	This course can include: A short introduction in the propulsion system of a vessel,	
	Investments in new (retofitable) technologies in deepsea vessels due to legislation,	
	Impact of the Environmental Efficiency Design Index (EEDI) of deepsea vessels on	
	CO2 emissions, Impact of the Emission Control Area at the North Sea on port	
	competition, Impact of the internalization of external cost on port competition.

	Metodologías
Metodologías	Descripción

Sesión magistral	Oral presentation complemented with the use of audiovisual media and the introduction of some questions aimed at students,
	in order to transmit knowledge and facilitate learning
Trabajos tutelados	Supervised learning process aimed at helping students to work independently in a range of contexts (academic and
	professional). Focused primarily on learning ?how to do things? and on encouraging students to become responsible for their
	own learning.
Prueba mixta	Written test used for the assessment of learning, whose distinctive feature is the ability to determine whether or not the
	answers given are correct. It is a rigorously developed measuring instrument that allows to assess knowledge, abilities, skills,
	performance, aptitudes, attitudes, etc.

	Atención personalizada
Metodologías	Descripción
Sesión magistral	Students will be able to solve their doubts through personalized tutorials. To contact the teaching staff, they may use email or
Trabajos tutelados	Teams.

	Evaluación		
Metodologías	Competéncias	Descripción	Calificación
Trabajos tutelados	B3 B5 B8 C2 C7 C8	Group coursework: a research paper on a given topic for which a model can be given 40	
		to the students to make use of	
Prueba mixta	B2	The evaluation of the subject will be carried out through an exam where the	60
		knowledge acquired by the student during the course will be assessed.	

Observaciones evaluación

General EMJMD Sustainable Ship and Shipping SEAS 4.0 evaluation rules:

- Students will have only two oportunities to pass a course. If failing to do so, they may be forced to leave the degree.

- No part time or lecture attendance exemption are allowed in this degree.

To help in achieving a sustainable environment and to get the objective of number 5 action of the "Ferrol Green Campus Action Plan" (Healthy and
environmentaly and socially sustainable research and teaching): The assignments to be done in this course:- Will be required in digital format Will be
delivered using Moodle, with no need to print them. In case it is necessary to print them:- Plastics won't be used Two side printing will be used
Recycled paper will be used Printing drafts will be avoided.A sustainable use of the resources should be done, together with the prevention of
