Descripción xeral	The goal of this subject is to provide a basic theoretical and practical understanding of modelling and simulation technologies (M&S) applied to shipbuilding. M&S is considered one of the Industry 4.0 technologies that allows shipyards to optimize manufacturing processes and logistics. The simulation software Flexsim will be used to solve practical cases based on real problems solved in shipyards.			

Competencias do título	
Código	Competencias do título
B7	CG1 ? To display the adequate intercultural competence to successfully navigating within multicultural learning environments and to implement basic management principles suitable for a multicultural working environment.
B8	CG2 ? To express an attitude of intellectual inquisitiveness and open-mindedness.
B11	CG5 ? To have the capability to identify, formulate and solve engineering problems within realistic constraints.
B13	CG7 ? To have the capability to critically analyse, synthesise, interpret and summarise complex scientific processes.
C2	CT2 - Mastering oral and written expression in a foreign language.
C3	CT3 - Using ICT in working contexts and lifelong learning.
C4	CT4 - Acting as a respectful citizen according to democratic cultures and human rights and with a gender perspective.
C6	CT6 - Acquiring skills for healthy lifestyles, and healthy habits and routines.
C7	CT7 -Developing the ability to work in interdisciplinary or transdisciplinary teams in order to offer proposals that can contribute to a sustainable environmental, economic, political and social development.

Resultados da aprendizaxe			
Resultados de aprendizaxe			Competencias do título
To have basic knowledge about the modelling and simulation methodology.			BM6 CM2 BM7 CM3 BM10 CM4 BM12 CM6 CM7
To solve realistic problems about process optimization and planning in shipyards using simulation.			BM6 CM2 BM7 CM3 BM10 CM4 BM12 CM6 CM7

Contidos	
Temas	Subtemas
Modelling and Simulation	The M&S methodology. M&S technologies. Simulation projects.
Model development in Flexsim	Flexsim basics. Fixed resource library. Task executors. Networks and conveyors. Introduction to process flows.
Shipbuilding processes	Cutting-welding. Block assembly. Outfitting. Painting. Blocks erection.
Shipyard simulation.	Material receipts. Assembly workstations. Blocks erection. Cranes. Planning.
Optimization	Input data analysis. Simulation experiments. Optimization concepts. Linear models. Heuristics. Evolutionary algorithms.

Planificación				
Metodoloxías / probas	Competencias	Horas presenciais	Horas non presenciais / traballo autónomo	Horas totais
Prácticas a través de TIC	A2 A3 B7 B8 B11 B13 C2 C3 C4 C6 C7	15	15	30
Estudo de casos	B7 B8 B11 B13 C2 C3 C4 C6 C7	4.5	22.5	27

Sesión maxistral	A2 A3 B8 B11 B13	21	21	42
Atención personalizada		5	0	5

*Os datos que aparecen na táboa de planificación son de carácter orientativo, considerando a heteroxeneidade do alumnado

Metodoloxías	
Metodoloxías	Descripción
Prácticas a través de TIC	Solving practical problems and case studies using Flexsim.
Estudo de casos	Solving practical cases proposed by the teachers
Traballos tutelados	Simulation project proposed by the teachers
Proba mixta	Final exam about the contents of this subject.
Sesión maxistral	Lectures on the subject contents

Atención personalizada	
Metodoloxías	Descripción
Prácticas a través de TIC	During tutorial time, students can meet the teachers to clarify the doubts of the subject, as well as the ones concerning the supervised projects
Proba mixta	
Sesión maxistral	
Estudo de casos	
Traballos tutelados	

Avaliación			
Metodoloxías	Competencias	Descripción	Cualificación
Proba mixta	B7 B8 B11 B13 C2 C3 C4 C6 C7	Assessment of the final exam	20
Estudo de casos	B7 B8 B11 B13 C2 C3 C4 C6 C7	Assessment of the practical cases assigned to the students.	20

Traballos tutelados	A2 A3 B7 B8 B11 B13 C2 C3 C4 C6 C7	Assessment of the supervised project assigned to the students.	60

Observacións avaliación

Assessment criteria

Second opportunity

The assessment criteria for the first and the second opportunity are the same.

'No Presentado' grade

The grade of "No presentado" (no grade) will be given to those students who will not hand in the supervised project.

Additional information

Fraudulent behaviour in any of the parts subject to assessment will result in the grade of "Fail (0)" in the final assessment.

General EMJMD Sustainable Ship and Shipping SEAS 4.0 evaluation rules:

- Students will have only two opportunities to pass a course. If failing to do so, they may be forced to leave the degree.
- No part time or lecture attendance exemption are allowed in this degree.

Observacións

To help in achieving a sustainable environment and to get the objective of number 5 action of the "Ferrol Green Campus Action Plan" (Healthy and environmentaly and socially sustainable research and teaching): - Will be required in digital format. - Will be delivered using Moodle, with no need to print them. In case it is necessary to print them: - Plastics won't be used. - Two side printing will be used. - Recycled paper will be used. - Printing drafts will be avoided. A sustainable use of the resources should be done, together with the prevention of negative impacts on the environment.
