	Study programme competences
Code	Study programme competences
A10	CR4 Coñecemento e utilización dos principios de teoría de circuítos e máquinas eléctricas.
B2	CB2 Que os estudantes saiban aplicar os seus coñecementos ao seu traballo ou vocación dunha forma profesional e posúan as
	competencias que adoitan demostrarse por medio da elaboración e defensa de argumentos e a resolución de problemas dentro da súa
	área de estudo
B3	CB3 Que os estudantes teñan a capacidade de reunir e interpretar datos relevantes (normalmente dentro da súa área de estudo) para
	emitiren xuízos que inclúan unha reflexión sobre temas relevantes de índole social, científica ou ética
B5	CB5 Que os estudantes desenvolvan aquelas habilidades de aprendizaxe necesarias para emprenderen estudos posteriores cun alto
	grao de autonomía
B7	B5 Ser capaz de realizar unha análise crítica, avaliación e síntese de ideas novas e complexas
C1	C3 Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión
	e para a aprendizaxe ao longo da súa vida.
C5	C7 Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.

	Methodologies
Methodologies	Description
Introductory activities	Presentation of the subject, in large group (GG).

Guest lecture /	Oral presentation complemented the use of media and the introduction of questions aimed at motivating students, in order to
keynote speech	impart knowledge and facilitate learning.
	Corresponds to the kind of theory, large group (GG).
Problem solving	Technique by to be solved a particular problem situation, from the knowledge and procedures that have been studied and worked.
	Corresponds to the class of problems, medium (GM) group.
Laboratory practice	Methodology that allows students to apply the knowledge acquired through the completion of practical activities.
	It is for the workshop exercises, small group (GP).
Mixed	This test consists of the resolution of problems and / or elements, and will be valued among 0 to 10 points.
objective/subjective	
test	

	Personalized attention
Methodologies	Description
Guest lecture /	Tutorials review.
keynote speech	
Problem solving	In the case of part-time students, they will have exam sessions before each continuous assessment exam. In addition, they
Mixed	will be given a collection of objective tests and problems to solve throughout the course.
objective/subjective	
test	

		Assessment	
Methodologies	Competencies	Description	Qualification
Laboratory practice	A10 B2 B3 B5 B7 C1	In the January announcement, the grade will be the sum of the amount of the	20
	C5	assistance and assessment practices workshop note, which is valued between 0 and	
		5 points, and the note of a final exam (multiple choice test), which was also assessed	
		from 0 to 5 points.	
		In the July, qualifying match corresponding note final exam (multiple choice test),	
		which is valued between 0 and 10 points.	
Mixed	A10	This test consists of the resolution of problems and / or elements, and will be valued	80
objective/subjective		among 10 points.	
test			
		In laboratory practices:	
		In the January exam, the grade will be the sum of the grade corresponding to the	
		attendance and evaluation of the workshop practices, which will be assessed between	
		0 and 5 points, and the final exam grade (mixed test), which will also be assessed.	
		between 0 and 5 points	
		In the July session, the grade will coincide with the corresponding final exam (mixed	
		test), which will be assessed between 0 and 10 points.	

Assessment comments

To pass the subject it is necessary to approve the theory and problems part and the laboratory practices part. The subject will also be approved if reaching a grade superior or equal to 3'5 points in the note of laboratory practices, will compensate with the part of theory and problems. The final grade is the sum of the (note of theory and problems) \* 0'80 and of the (note of laboratory practices) \* 0'20. In the presentation of the subject (first day of class) may indicate additional activities whose assessment will be added to the note of the objective test of the theory and problems. In any case, the note of this part can not be higher than 10 points.

In the case of part-time students, there will be a periodic and continuous evaluation, with objective tests and problems, after imparting each topic of the subject. On the second opportunity, all subjects will enter the exam. Attendance at theory and problem classes is not mandatory (100% waiver), although you will be offered full flexibility to assist the group of your choice; however, attendance at the workshop practice class is necessarily mandatory (0% waiver), although you will also be offered full assistance flexibility
