

		Teaching Guide			
	Identifying	j Data			2020/21
Subject (*)	Simulation of Industrial Processes and Optimization Code			730G04074	
Study programme	Grao en enxeñaría en Tecnoloxías	Industriais			
	1	Descriptors			
Cycle	Period	Year		Туре	Credits
Graduate	2nd four-month period	Fourth		Optional	6
Language	Spanish		I		I
Teaching method	Hybrid				
Prerequisites					
Department	Empresa				
Coordinador	Garcia del Valle, Alejandro		E-mail	alejandro.garcia	a.delvalle@udc.es
Lecturers	Garcia del Valle, Alejandro		E-mail	alejandro.garcia	a.delvalle@udc.es
	Lamas Rodriguez, Adolfo			adolfo.lamasr@udc.es	
Web		i		I	
General description					
Contingency plan	1. Modifications to the contents				
	1. Modifications in the contents: the	ey are not modified			
	2. Methodologies: all are maintaine	ed but by videoconferer	nce.		
	* Teaching methodologies that are maintained: all, but all become by videoconference.				
	* Teaching methodologies that are	modified: none are mo	odified.		
	tention to students				
	By email to teachers				
	Through the team created at TEAM	/IS.			
	4. Modifications in the evaluation: t	they are not modified. T	The exam v	vill be done by TEAN	IS if it cannot be done in perso

	Study programme competences
Code	Study programme competences
B5	CB5 Que os estudantes desenvolvan aquelas habilidades de aprendizaxe necesarias para emprenderen estudos posteriores cun alto
	grao de autonomía
B7	B5 Ser capaz de realizar unha análise crítica, avaliación e síntese de ideas novas e complexas
B9	B8 Adquirir unha formación metodolóxica que garanta o desenvolvemento de proxectos de investigación (de carácter cuantitativo e/ou
	cualitativo) cunha finalidade estratéxica e que contribúan a situarnos na vangarda do coñecemento

Learning outcomes	
Learning outcomes	Study programme
	competences
Know how to formulate and solve situation problems where there is randomness.	B5
	B7
	B9
Ability to abstract, understand and analyze processes.	B5
	B7
	B9
Know how to use simulation software. Solve problems of complex industrial processes.	B5
	B7
	B9

	Contents	
Торіс	Sub-topic	
The following topics develop the contents established in the	Simulation. Modeling and simulation. Discrete Event Simulation. Concepts used in	
tab of the Verification Memory that are:	simulation of discrete events. Advanced simulation techniques.	
Discrete Event Simulation: concepts.	Introduction. Simulation applications. Systems, models and simulation. Types of	
	simulation. The modeling process. Systems and processes of discrete events.	
	Terminology and architecture of a discrete event model. Application areas.	
2. Flexsim 3D: bases.	Sources. Queues Processors Sinks. Practical case.	
	Tags, decisions, popups. Practical case	
	Libraries of standard objects I: Combiner. Separator. Multiprocessor. Rack. Conveyor.	
	Practical case.	
	Libraries of standard objects II: Task Executer. Operator. Transporter. Elevetor.	
	Robot. Crane. ASRSvehicle. Practical case.	
3. Analysis of input data for simulation and time measurement.	Practical case.	
4. Simulation: experiments and analysis of results.	Practical case.	
5. FlexSim: Tables, variables, connection with Excel.	Global tables. Labels Global variables. Monitoring variables. Connection with Excel.	
	Modification of variables. Case study.	
6. Advanced simulation techniques.	Introduction to Process Flow.	
7. Optimization.	Linear programming. Non-Linear Programming Metaheuristics.

(*)The information in the planning table is for	uidance only and does not	take into account the	heterogeneity of the stu	idents.

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

	Methodologies	
Methodologies	Description	
Guest lecture /	Lectures about the course topics.	
keynote speech		
Problem solving	Problem solving Solving simulation and optimization problems encountered in engineering.	
ICT practicals	acticals Resolution of practical cases of simulation and optimization problems.	

	Personalized attention
Methodologies	Description
ICT practicals	The personalized attention will be made in the tutorials.
Guest lecture /	
keynote speech	
Problem solving	

		Assessment	
Methodologies	Competencies	Description	Qualification
ICT practicals	B5 B7 B9	La evaluación se hará en base a los trabajos realizados en las clases prácticas en 100	
		clase así como los trabajos individuales en casa. Todos ellos se subirán a la	
		plataforma Moodle.	

Assessment comments

First opportunity evaluation: 100% of the grade will be obtained through the weighted average grade obtained in the exercises carried out through ICT practices.

Second chance evaluation: the same criteria will be followed as for the first opportunity.

The "students with recognition of part-time dedication and academic exemption of attendance exemption" will communicate at the beginning of the course their situation to the teachers of the subject, as established by the "Standard that regulates the regime of dedication to the study of undergraduate students in the UDC "(Art.3.be 4.5) and the" Standards for evaluation, review and claim of the qualifications of the undergraduate and master's degree studies (Art. 3 e 8b). The students in this situation will be evaluated by solving the same practical cases proposed in exercises through ICT practices.

Recommendations
Subjects that it is recommended to have taken before
Subjects that are recommended to be taken simultaneously
Subjects that continue the syllabus
Other comments
A sustainable use of resources must be made to prevent the negative impact on the natural environment. For this reason, the delivery of the
documentary works carried out in this subject:? They will be requested in virtual format and / or computer support? It will be done through Moodle, in
digital format without needing to print them? If it is necessary to make them on paper: a) plastics will not be used, b) double-sided impressions will be

made, c) recycled paper will be used, d) the printing of drafts will be avoided.
