

## Teaching Guide

Teaching Guide				
Identifying Data				2018/19
Subject (*)	Química		Code	770G02004
Study programme	Grao en Enxeñaría Eléctrica			
Descriptors				
Cycle	Period	Year	Type	Credits
Graduate	1st four-month period	First	Basic training	6
Language	Spanish			
Teaching method	Face-to-face			
Prerequisites				
Department	Química			
Coordinador	Alonso Rodriguez, Elia	E-mail	elia.alonso@udc.es	
Lecturers	Alonso Rodriguez, Elia	E-mail	elia.alonso@udc.es	
	Gonzalez Rodriguez, Maria Victoria		victoria.gonzalez.rodriguez@udc.es	
Web				
General description	Introduction to the scientific foundations of chemistry in relation to their technological applications			

## Study programme competences

Code	Study programme competences
------	-----------------------------

## Learning outcomes

Learning outcomes	Study programme competences		
Utilize the basic principles of general chemistry, organic chemistry and inorganic chemistry.	A8		C3
Apply the basic laws governing reactions: thermodynamics, kinetics and equilibrium.	A8		C3
Solve problems and analyze results.		B1	
Adequately apply theoretical concepts in the laboratory through the correct and safe use of basic material and equipment		B1	
		B4	
Use rigorous language in chemistry		B2	
Present and interpret data and results		B6	

## Contents

Topic	Sub-topic
Unity 1. Chemistry basics	Includes topic 1
Topic 1. Basics of Chemistry.	<ul style="list-style-type: none"> <li>- Stoichiometry. Theoretical and Percentage Yields. Limiting Reactant.</li> <li>- Atoms. The Quantum Mechanical Model.</li> <li>- Periodic Table of the Elements.</li> <li>- Chemical Bond. Main types of chemical bonds: ionic, covalent, metallic.</li> <li>Intermolecular Forces.</li> </ul>
Unity 2. Thermochemistry	Includes topic 2
Topic 2. Thermochemistry	<ul style="list-style-type: none"> <li>- Heats of Chemistry Reaction</li> <li>- Enthalpy</li> <li>- Calorimetry</li> <li>- Introduction to thermodynamics</li> </ul>
Unity 3. Rates of Reaction	Includes topic 3

Topic 3. Rates of Reaction	<ul style="list-style-type: none"><li>- Reaction Rates</li><li>- Reaction Rates Equation</li><li>- Dependence of Rate on Concentration</li><li>- Activation energy</li><li>- Catalysis</li><li>- Mechanism</li></ul>
Unity 4. Chemical Equilibrium	Includes topic 4
Topic 4. Chemical Equilibrium	<ul style="list-style-type: none"><li>- Chemical Equilibrium. The Equilibrium Constant.</li><li>- Gaseous Reactions. Le Chatelier's Principle</li><li>- Acid-Base Equilibria</li></ul>
Unity 5. Electrochemistry	Includes topics 5, 6 and 7
Topic 5. Electrochemistry I	<ul style="list-style-type: none"><li>- Oxidation -Reduction Reactions. Balancing</li><li>- Standard Electrode Potentials</li><li>- Spontaneity from Electrode Potentials</li><li>- Nernst Equation</li></ul>
Topic 6. Electrochemistry II	<ul style="list-style-type: none"><li>- Voltaic Cells. Batteries</li><li>- Electrolysis. Stoichiometry of Electrolysis</li></ul>
Topic 7. Corrosion	<ul style="list-style-type: none"><li>- Concept</li><li>- Corrosion process and influence factors</li><li>- Methods to protect metals from corrosion</li><li>- Atmospheric Corrosión</li><li>- Marine Corrosion</li></ul>
Unity 6. Principles of Organic Chemistry	Includes topic 8
Topic 8. Organic Chemistrya	<ul style="list-style-type: none"><li>- Introduction to Organic Chemistry</li><li>- Functional Groups</li><li>- Nomenclature</li><li>- Isomers</li><li>- Main types of organic reactions</li></ul>
Unity 7. Organic and Inorganic Chemistry Applied to Engineering	Includes topics 9 and 10
Topic 9. Organic Chemistry Applied to Engineering	<ul style="list-style-type: none"><li>- Carbon</li><li>- Oil</li><li>- Gas</li><li>- Biomass</li><li>- Polymers</li></ul>
Topic 10. Inorganic Chemistry Applied to Engineering	<ul style="list-style-type: none"><li>- Metallurgy</li><li>- Industrial Inorganic Compounds: Synthesis</li><li>- Main Technologic Inorganic Materials: Semiconductors, Optic Fiber, Ceramic, Superconductors</li></ul>
Unity 8. Bases of Industrial Chemistry: Mass Balance	Includes topic 8
Topic 11. Introduction to Industrial Chemistry	<ul style="list-style-type: none"><li>- Engineering Process</li><li>- Mass Balance</li></ul>
Unity 9. Principles of Instrumental Analysis	Includes topic 12
Topic 12. Introduction to Instrumental Techniques for Industrial Analysis	<ul style="list-style-type: none"><li>- Classification of Instrumental Techniques</li><li>- Quality Parameters in the Analytical Laboratory</li><li>- Calibration</li><li>- Significant Digits</li></ul>

Methodologies / tests	Competencies	Ordinary class hours	Student's personal work hours	Total hours
Guest lecture / keynote speech	A8	21	29.4	50.4
Problem solving	B1	20	38	58
Laboratory practice	A8 B4 B6 C3	5	10	15
Supervised projects	B2 C3	3	6	9
Objective test	A8 B1	4	12	16
Personalized attention		1.6	0	1.6

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Participants take notes and make questions
Problem solving	Participants apply rules, write mathematical relationships and analyze results
Laboratory practice	Participants perform an experiment following a written procedure and write a report
Supervised projects	Participants summarize and discuss information
Objective test	Participants answer questions and problems

Personalized attention	
Methodologies	Description
Supervised projects	<p>Reviewing the development of intermediate and final stages of supervised projects</p> <p>Resolving specific issues</p> <p>Students being recognized officially as partial-time and entitled not to attend the lectures will be attended in a tutorships regime (set hour with teacher in advance).</p>

Assessment			
Methodologies	Competencies	Description	Qualification
Problem solving	B1	Resolution of exercises and ability to explain them in the classroom	10
Laboratory practice	A8 B4 B6 C3	Carry out the laboratory practices and reports and ability to work collaboratively	10
Supervised projects	B2 C3	Elaboration of supervised projects and presentation in the classroom. Performing an activity and objective test.	10
Objective test	A8 B1	<p>A first test (theory and problems) will be carried out about half of the semester. The subject taught until then will be evaluated. At the end of course, a partial second test (theory and problems) will be performed for students who have passed the first test. Simultaneously a global test (theory and problems) will be performed for students who have not approved the first test.</p> <p>Each test consists of two independent parts, being necessary to obtain a minimum score on each part to compensate:</p> <ul style="list-style-type: none"> <li>- Theory, maximum score 4 points, minimum score 1.5 points to compensate.</li> <li>- Problems, maximum score 3 points, 1 point minimum to compensate score.</li> </ul>	70

Assessment comments
---------------------

A minimum of 75% of the laboratory practical classes have to be carried out by each student to be evaluated.

A minimum mark of 3 points is requested in the test to take into account the other marks.

For students being recognized officially as partial-time and entitled not to attend the lectures, the final exam represent 80% of the final grade and supervised projects 20%.

## Recommendations

### Subjects that it is recommended to have taken before

### Subjects that are recommended to be taken simultaneously

### Subjects that continue the syllabus

Environmental Engineering/770G01014

## Other comments

Recommendations Sustainability Environment, Person and Gender Equality:1.

The delivery of the works (supervised work) that are carried out in this matter will be done in the following way:

- 1.1. It will be delivered in virtual format and / or computer support
- 1.2. In the case of having to print something on paper, it will be made on recycled and double-sided paper. Drafts will not be printed, only the final version.
2. It must make a sustainable use of resources and the prevention of negative impacts on the natural environment. It will be encouraged that the materials that are discarded in the matter (papers, plastics) are thrown in the respective containers enabled in the streets for such purpose.
3. It will try to convey to students the importance of ethical principles related to the values ??of sustainability so that they apply not only in the classroom, but in personal and professional behaviors.
4. The gender perspective must be incorporated in this subject, so the works delivered by the students and the material prepared by the teacher must use non-sexist language.
5. It will facilitate the full integration of students who for physical, sensory, psychic or sociocultural reasons, experience difficulties to an adequate, equal and profitable access to university life.

(\*)The teaching guide is the document in which the URV publishes the information about all its courses. It is a public document and cannot be modified. Only in exceptional cases can it be revised by the competent agent or duly revised so that it is in line with current legislation.
